### 1 CEN/TC 93

#### Decision CEN/TC 93 C407/2016 taken on 2016-12-20

#### Subject: Adoption of a New Work Item

##### CEN/TC 93 Ladders

- having considered the proposal for a new work item as documented in CEN/TC 93 N 870
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item	The revision of an EN

corresponds to	EN 131-6:2015
3. Document developed in drafting body	CEN/TC 93/WG 12 - Telescopic ladders
4. Title	Ladders - Part 6: Telescopic ladders
5. Scope	<p>This European Standard specifies the general design features, requirements and test methods and defines terms for leaning and standing telescopic ladders.</p> <p>Ladders with extension elements are not covered by this part of EN 131.</p> <p>This part of the standard is intended to be used in conjunction with EN 131-1:2007+A1:2011, EN 131 2:2010+A1:2012, EN 131-3:2007 and if applicable EN 131-4:2007.</p>
6. Environmental aspects	Use of materials
7. How do you plan to address these environmental aspects?	Bring in environmental expertise to the WG
8. Vienna Agreement	No or expected CEN lead
9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	Yes M/285
12. Related directive(s)	Yes Directive reference   For citation in Official journal 2001/95/EC   No
13. Commitment	<p>The following CEN members (at least five) are committed to participate in the development of the project:</p> <p>AFNOR BSI UNI DIN NEN</p>
14. The decision was taken by	<p>Weighted vote and simple majority</p> <p>Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):100</p> <p>Number of positive votes: 11</p> <p>Number of negative votes: 0</p> <p>Number of abstentions: 9</p>

## Decision CEN/TC 93 C408/2016 taken on 2016-12-20

### Subject: Adoption of a New Work Item

#### CEN/TC 93 - Ladders

- having considered the proposal for a new work item as documented in CEN/TC 93 N
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	The revision of an EN EN 131-4:2007
3. Document developed in drafting body	CEN/TC 93/WG 2 - Single and multiple hinge-joint ladders
4. Title	Ladders - Part 4: Single or multiple hinge-joint ladders
5. Scope	This European Standard specifies the requirements, tests and marking of hinged combination ladders with one or several hinge joints. This European Standard is not applicable to hinge-joints of combination and standing ladders as defined by EN 131 1. This part of the standard is intended to be used in conjunction with EN 131 1 and EN 131 2.
6. Environmental aspects	Use of materials
7. How do you plan to address these environmental aspects?	Bring in environmental expertise to the WG
8. Vienna Agreement	No or expected CEN lead
9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)

11. Related mandate(s)	Yes M/285
12. Related directive(s)	Yes Directive reference   For citation in Official journal 2001/95/EC   Yes
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: AFNOR BSI UNI DIN NEN
14. The decision was taken by	Weighted vote and simple majority Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):100 Number of positive votes: 10 Number of negative votes: 0 Number of abstentions: 10

## 2 CEN/TC 128

### Decision CEN/TC 128 C474/2016 taken on 2016-05-20

#### Subject: Adoption of a New Work Item

CEN/TC 128 - Roof covering products for discontinuous laying and products for wall cladding

- having considered the proposal for a new work item as documented in CEN/TC 128 N 1782
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item	The revision of an EN

corresponds to	EN 507:1999
3. Document developed in drafting body	CEN/TC 128/SC 7 - Roofing products from metal sheet
4. Title	Roofing products from metal sheet - Specification for fully supported roofing products of aluminium sheet
5. Scope	This European Standard specifies requirements for roofing products used for assembly into coverings for pitched roofs, made from aluminium sheet with or without additional organic coatings. The standard establishes general characteristics, definitions and labelling of the products, together with requirements for the materials from which the products can be manufactured. It is intended to be used either by manufacturers to ensure that their products comply with the requirements or by purchasers to verify that the products comply before they are despatched from the factory.
6. Environmental aspects	Use of energy Use of materials
7. How do you plan to address these environmental aspects?	Bring in environmental expertise to the WG
8. Vienna Agreement	No or expected CEN lead
9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	No
12. Related directive(s)	Yes Directive reference   For citation in Official journal 305/2011   No
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: AFNOR BSI UNI DIN NBN NQIS/ELOT PKN
14. The decision was taken by	Simple majority (min. 55% as from 2017-01-01) Number of positive votes: 7 Number of negative votes: 2 Number of abstentions: 12

## Decision CEN/TC 128 C478/2016 taken on 2016-05-20

### Subject: Adoption of a New Work Item

CEN/TC 128 - Roof covering products for discontinuous laying and products for wall cladding

- having considered the proposal for a new work item as documented in CEN/TC 128 N 1786
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	The revision of an EN EN 508-2:2008
3. Document developed in drafting body	CEN/TC 128/SC 7 - Roofing products from metal sheet
4. Title	Roofing and cladding products from metal sheet - Specification for self-supporting products of steel, aluminium or stainless steel sheet - Part 2: Aluminium
5. Scope	<p>This part of EN 508 specifies requirements for self-supporting wall cladding, lining and liner tray products for discontinuous laying made from aluminium sheet with or without surface treatment (additional organic coatings or anodising).</p> <p>The standard establishes general characteristics, definitions, classifications and labelling for the products, together with requirements for the materials from which the products can be manufactured. It is intended to be used either by manufacturers to ensure that their products comply with the requirements or by purchasers to verify that the products comply before they are made available on the market before being despatched from the factory. It specifies the requirements for products which enable them to meet all normal service conditions.</p> <p>The standard applies to all discontinuously laid self-supporting external profiled sheets for roof covering, wall cladding, lining and liner trays with the exception of tiles with a surface area less than 1 m<sup>2</sup> and produced by stamping. These profiled roof sheets are designed to keep wind, rain and snow out of the building, and to</p>

	<p>transfer any resultant loads and infrequent maintenance loads to the structure.</p> <p>This standard does not cover products for structural purposes, i.e. it does not cover products used in structural class III (according to EN 1999-1-4), it does not cover products used in constructions of Structural Classes I and II (according to EN 1999-1-4) intended to contribute to the global or partial stability of the building structure by providing racking resistance or resistance of permanent static loads (excluding self-weight of the metal sheet).</p> <p>No requirements for supporting construction, design of roof system and execution of connections and flashings are included.</p>
6. Environmental aspects	<p>Use of energy</p> <p>Use of materials</p>
7. How do you plan to address these environmental aspects?	<p>Bring in environmental expertise to the WG</p>
8. Vienna Agreement	<p>No or expected CEN lead</p>
9. The project is linked to	<p>No document from another organization</p>
10. Track	<p>Enquiry + Formal Vote (ENQ+FV)</p>
11. Related mandate(s)	<p>No</p>
12. Related directive(s)	<p>Yes                      Directive reference   For citation in Official journal                      305/2011   No</p>
13. Commitment	<p>The following CEN members (at least five) are committed to participate in the development of the project:</p> <p>AFNOR                      SIS                      BSI                      UNI                      DIN                      NBN                      NEN                      NQIS/ELOT                      PKN</p>
14. The decision was taken by	<p>Simple majority (min. 55% as from 2017-01-01)</p> <p>Number of positive votes: 9</p> <p>Number of negative votes: 2</p> <p>Number of abstentions: 10</p>

**3 CEN/TC 142**

**Decision CEN/TC 142 5/2016 taken on 2016-08-21**

**Subject: Adoption of a New Work Item**

CEN/TC 142 - Woodworking machines - Safety

- having considered the proposal for a new work item as documented in CEN/TC 142 N 1322
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 142 - Woodworking machines - Safety
4. Title	Woodworking machines – Safety – Part 12: Tenoning / profiling machines
5. Scope	<p>This part of ISO 19085 gives the safety requirements and measures for stationary, manually loaded and unloaded:</p> <ul style="list-style-type: none"> <li>- single end tenoning machines with manual feed sliding table,</li> <li>- single end tenoning machines with mechanical feed sliding table,</li> <li>- single end tenoning and/or profiling machines with mechanical feed,</li> <li>- double end tenoning and/or profiling machines with mechanical feed, also designed to be automatically loaded/unloaded,</li> <li>- angular systems for tenoning and profiling with mechanical feed,</li> </ul> <p>with maximum work-piece height capacity of 200 mm for single end machines and 500 mm for double end machines, hereinafter referred to as –machines– .</p> <p>It deals with all significant hazards, hazardous situations and events relevant to machines, when operated, adjusted and maintained as intended and under the conditions foreseen by the manufacturer</p>

	including reasonably foreseeable misuse. Also transport, assembly, dismantling, disabling and scrapping phases are taken into account.
6. Environmental aspects	Noise/Vibration
7. How do you plan to address these environmental aspects?	Bring in environmental expertise to the WG
8. Vienna Agreement	Yes - Parallel ISO lead ISO project reference: ISO 19085-12 ISO project ID: 67639 ISO TC: ISO/TC 39
9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	Yes M/396
12. Related directive(s)	Yes Directive reference   For citation in Official journal 2006/42/EC   Yes
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: IPQ AFNOR ASI UNI DIN
14. The decision was taken by	Weighted vote and simple majority Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):100 Number of positive votes: 8 Number of negative votes: 0 Number of abstentions: 9

## Decision CEN/TC 142 6/2016 taken on 2016-08-21

### Subject: Adoption of a New Work Item

#### CEN/TC 142 - Woodworking machines - Safety

- having considered the proposal for a new work item as documented in CEN/TC 142 N 1323
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS

- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 142 - Woodworking machines - Safety
4. Title	Woodworking machines – Safety – Part 13: Multi-blade rip sawing machines with manual loading and/or unloading
5. Scope	<p>This international standard deals with all significant hazards, hazardous situations and events relevant to stationary multi-blade rip sawing machines, hereinafter referred to as “machines”, designed to cut solid wood and material with similar physical characteristics as wood, when operated, adjusted and maintained as intended and under the conditions foreseen by the manufacturer including reasonably foreseeable misuse. Also transport, assembly, dismantling, disabling and scrapping phases are taken into account. This international standard does not apply to machines with vertical roller feed or vertical chain conveyor feed or machines designed to make the first rip cut on a log.</p> <p>This international standard does not deal with specific hazards related to the combination of single machines with any other machine as part of a line.</p>
6. Environmental aspects	Noise/Vibration
7. How do you plan to address these environmental aspects?	Bring in environmental expertise to the WG
8. Vienna Agreement	Yes - Parallel ISO lead ISO project reference: ISO 19085-13 ISO project ID: 67640 ISO TC: ISO/TC 39
9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related	Yes

mandate(s)	M/396
12. Related directive(s)	Yes Directive reference   For citation in Official journal 2006/42/EC   Yes
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: IPQ AFNOR ASI UNI DIN
14. The decision was taken by	Weighted vote and simple majority Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):100 Number of positive votes: 8 Number of negative votes: 0 Number of abstentions: 9

## 4 CEN/TC 155

### Decision CEN/TC 155 1309/2016 taken on 2016-10-14

#### Subject: Adoption of a Preliminary Work Item

CEN/TC 155 Plastics piping systems and ducting systems

- having considered the proposal for a new work item as documented in CEN/TC 155 N
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	TS
2. This item corresponds to	A new project

3. Document developed in drafting body	CEN/TC 155 - Plastics piping systems and ducting systems
4. Title	Plastic piping systems for underground cable duct $\hat{\lambda}$ $\hat{\lambda}$ Specification of alternative and additional characteristics and tests for thermoplastic solid wall conduit systems
5. Scope	<p>This Technical Specification specifies the additional and alternative requirements for solid wall conduit systems made of PE, PP and PVC. This Technical Specification also specifies the test parameters for the test methods referred in this Technical Specification.</p> <p>This Technical Specification is applicable to pipes and fittings with or without integral socket.</p> <p>The fittings can be manufactured by injection-moulding or be fabricated from pipes and/or mouldings.</p> <p>The components in a thermoplastic solid wall conduit systems can consist of different thermoplastics materials or non-thermoplastics materials.</p> <p>NOTE: This CEN/TS XXXXX can only be used in connection with EN 50626-2.</p>
6. Environmental aspects - OPTIONAL	Other: Not addressed by CEN/TC 155
7. How do you plan to address these environmental aspects? - OPTIONAL	Other: not applicable
8. Track	Vote on TS/TR by correspondence
9. Related mandate(s)	No
10. Related directive(s)	No
11. The decision was taken by	<p>Simple majority</p> <p>Number of positive votes: 12</p> <p>Number of negative votes: 1</p> <p>Number of abstentions: 6</p>

## Decision CEN/TC 155 1313/2016 taken on 2016-11-24

### Subject: 3 year time-frame for the development of WI 00155830 - 9 month Tolerance Request.

CEN/TC 155 Plastics piping systems and ducting systems

1. considering Resolution BT 34/2002 by which BT decided that any work item to result in an EN, registered after 2002-10-31, shall normally result in an EN after 3 years and set maximum times between well identified stages, as well as Resolution BT 42/2003 deciding on variant timeframes;
2. considering Resolution BT 42/2008 allowing the CEN/TCs, for well identified and justified reasons, to claim one tolerance of 9 months, applicable to the target dates for submission of a draft to CCMC (or ISO/CS in case of Vienna Agreement – CEN Lead) for the relevant procedure(s) (i.e. CEN Enquiry and/or Formal Vote, UAP, TCA);
3. considering that for work item 00155830 - *prEN 1401-1 rev - Plastics piping systems for non-pressure underground drainage and sewerage - Unplasticized poly(vinyl chloride) (PVC-U) - Part 1: Specifications for pipes, fittings and the system*, it proves impossible to Dispatch ENQ draft to CMC by 2017-04-02;
4. claims a tolerance of 9 months (i.e. a postponement of 9 months of the deadlines for all the stages not yet reached) for the following reasons:  
WG 6 is working on the revision of the new Annex 1 and the CEN Enquiry include it in prEN 1401 and the CEN Enquiry;
5. confirms that CEN/TC 155 will Dispatch ENQ draft to CMC (or ISO/CS in case of Vienna Agreement - CEN Lead) by 2018-01-02 at the latest.

The decision was taken by simple majority with 17 positive vote(s), 0 negative vote(s) and 0 abstention(s).

## 5 CEN/TC 190

### DECISION No 018 taken by CEN/TC 190 on 2016-11-23

CEN/TC 190 decides for the revision of EN 1563:

- considering Resolution BT 34/2002 by which BT decided that any work item to result in an EN, registered after 2002-10-31, shall normally result in an EN after 3 years and set maximum times between well identified stages, as well as Resolution BT 42/2003 deciding on variant timeframes;
- considering Resolution BT 42/2008 allowing the CEN/TCs, for well identified and justified reasons, to claim *one* tolerance of *9 months*, applicable to the target dates for submission of a draft to CCMC (or ISO/CS in case of Vienna Agreement – CEN Lead) for the relevant procedure(s) (i.e. CEN Enquiry and/or Formal Vote, UAP, TCA);

- considering that for work item 00190073 “Founding - Spheroidal graphite cast irons”, it proves **impossible to provide a draft for Formal Vote by 2017-02-03** (“**Dispatch FV draft to CMC: 2017-02-03**”);
- claims a tolerance of 9 months (i.e. a postponement of 9 months of the deadlines for all the stages not yet reached) **for the following reasons: the 2<sup>nd</sup> enquiry will be finished on 2017-02-09**;
- confirms that a draft will be sent to CCMC (or ISO/CS in case of Vienna Agreement – CEN Lead) for submission **to Formal Vote by 2017-11-03** at the latest.

The decision was taken by unanimity.

## **DECISION No 026 taken by CEN/TC 190 on 2016-11-23**

CEN/TC 190 decides for the revision of EN 287-6 to appoint Mr. Stellmacher as project leader.

- considering Resolution BT 34/2002 by which BT decided that any work item to result in an EN, registered after 2002-10-31, shall normally result in an EN after 3 years and set maximum times between well identified stages, as well as Resolution BT 42/2003 deciding on variant timeframes;
- considering Resolution BT 42/2008 allowing the CEN/TCs, for well identified and justified reasons, to claim *one* tolerance of *9 months*, applicable to the target dates for submission of a draft to CCMC (or ISO/CS in case of Vienna Agreement – CEN Lead) for the relevant procedure(s) (i.e. CEN Enquiry and/or Formal Vote, UAP, TCA);
- considering that for work item 00190073 “Founding - Spheroidal graphite cast irons”, it proves **impossible to provide a draft for Formal Vote by 2017-02-03** (“**Dispatch FV draft to CMC: 2017-02-03**”);
- **claims a tolerance of 9 months** (i.e. a postponement of 9 months of the deadlines for all the stages not yet reached) **for the following reasons: the convenor of the working group CEN/TC 190/WG 13 is no longer responsible. Due to this fact a project leader was appointed on 23<sup>rd</sup> November 2016 to handle the comments received during the CEN enquiry.**
- confirms that a draft will be sent to CCMC (or ISO/CS in case of Vienna Agreement – CEN Lead) for submission **to Formal Vote by 2017-11-03** at the latest.

The decision was taken by unanimity.

## **DECISION No 027 taken by CEN/TC 190 on 2016-11-23**

CEN/TC 190 decides for the revision of EN 1011-8 to appoint Mr. Stellmacher as project leader.

- considering Resolution BT 34/2002 by which BT decided that any work item to result in an EN, registered after 2002-10-31, shall normally result in an EN after 3 years

and set maximum times between well identified stages, as well as Resolution BT 42/2003 deciding on variant timeframes;

- considering Resolution BT 42/2008 allowing the CEN/TCs, for well identified and justified reasons, to claim *one* tolerance of *9 months*, applicable to the target dates for submission of a draft to CCMC (or ISO/CS in case of Vienna Agreement – CEN Lead) for the relevant procedure(s) (i.e. CEN Enquiry and/or Formal Vote, UAP, TCA);
- considering that for work item 00190073 “Founding - Spheroidal graphite cast irons”, it proves **impossible to provide a draft for Formal Vote by 2017-02-03** (“Dispatch FV draft to CMC: 2017-02-03”);
- **claims a tolerance of 9 months** (i.e. a postponement of 9 months of the deadlines for all the stages not yet reached) **for the following reasons: the convenor of the working group CEN/TC 190/WG 13 is no longer responsible. Due to this fact a project leader was appointed on 23<sup>rd</sup> November 2016 to handle the comments received during the CEN enquiry.**
- confirms that a draft will be sent to CCMC (or ISO/CS in case of Vienna Agreement – CEN Lead) for submission to **Formal Vote by 2017-11-03** at the latest.

The decision was taken by unanimity.

## 6 CEN/TC 194

### Decision CEN/TC 194 27/2016 taken on 2016-12-19

#### Subject: Adoption of a New Work Item

CEN/TC 194 Utensils in contact with food

- having considered the proposal for a new work item as documented in CEN/TC 194 N 448
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item	A new project

corresponds to	
3. Document developed in drafting body	CEN/TC 194 - Utensils in contact with food
4. Title	Materials and articles in contact with foodstuffs - Cutlery and table halloware - Part 9: Requirements for ceramic knives
5. Scope	This part specifies requirements and test methods for ceramic knives
6. Environmental aspects	None of the above: None of the above - Adoption of ISO 8442-9
7. How do you plan to address these environmental aspects?	Other: Adoption of ISO 8442-9
8. Vienna Agreement	Yes - Parallel ISO lead ISO project reference: ISO 8442-9 ISO project ID: 66329 ISO TC: ISO/TC 186
9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	No
12. Related directive(s)	No
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: AFNOR ASRO LST BDS UNMZ NQIS/ELOT HZN
14. The decision was taken by	Weighted vote and simple majority Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):100 Number of positive votes: 7 Number of negative votes: 0 Number of abstentions: 12

**7 CEN/TC 207**

**Decision CEN/TC 207 643/2016 taken on 2016-11-25**

**Subject: Adoption of a Preliminary Work Item**

CEN/TC 207 Furniture

- having considered the proposal for a new work item as documented in CEN/TC 207 N
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

<b>Section</b>	<b>Details</b>
1. Deliverable	EN
2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 207/WG 4 - Requirements for Outdoor furniture
4. Title	Street Furniture & Seating & Safety requirements
5. Scope	<p>This document specifies requirements and test methods for seating for the specific use of street furniture.</p> <p>NOTE Test methods will be added in the document if there are unique. If not, it will be deleted.</p> <p>It includes normal and reasonably foreseeable use including improper use.</p> <p>It does not include damage caused by vandalism.</p> <p>It does not include assessment of ageing or degradation.</p> <p>The tests are designed to evaluate structural strength of street furniture without regard to materials, design/construction or manufacturing processes.</p>
6. Environmental aspects - OPTIONAL	
7. How do you plan to address these	

environmental aspects? - OPTIONAL	
8. Track	Enquiry + Formal Vote (ENQ+FV)
9. Related mandate(s)	No
10. Related directive(s)	No
11. The decision was taken by	Simple majority Number of positive votes: 13 Number of negative votes: 0 Number of abstentions: 8

## 8 CEN/TC 248

### Decision CEN/TC 248 33/2016 taken on 2016-12-02

#### Subject: Activation of preliminary Work Item 00248599

CEN/TC 248 - Textiles and textile products

- having considered the proposal for the activation of work item 00248599 currently registered at preliminary stage 00.60 as documented in CEN/TC 248 N1418
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 248/WG 26 - Textiles -Test methods for analysis of EC restricted substances
4. Title	Textiles - Determination of metal content - Determination of lead

	release by artificial saliva solution
5. Scope	Describes a method for the determination of lead release in textiles
6. Environmental aspects	Other: No environmental comment
7. How do you plan to address these environmental aspects?	Use of environmental checklist
8. Vienna Agreement	No or expected CEN lead
9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	No
12. Related directive(s)	No
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: IPQ AFNOR SIS SNV UNI DIN
14. The decision was taken by	Weighted vote and simple majority Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):100 Number of positive votes: 12 Number of negative votes: 0 Number of abstentions: 7

## 9 CEN/TC 249

### Decision CEN/TC 249 616/2016 taken on 2016-12-18

#### Subject: Adoption of a Preliminary Work Item

##### CEN/TC 249 Plastics

- having considered the proposal for a new work item as documented in CEN/TC 249 N 1553

- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 249/WG 21 - Profiles for windows and doors
4. Title	Poly(vinyl chloride) (PVC) based profiles – Determination of the peel strength of profiles laminated with foils
5. Scope	This European Standard specifies a test method for determining the peel strength of poly(vinyl chloride) (PVC) based profiles laminated with foils.
6. Environmental aspects - OPTIONAL	None of the above: NA
7. How do you plan to address these environmental aspects? - OPTIONAL	Other: NA
8. Track	Enquiry + Formal Vote (ENQ+FV)
9. Related mandate(s)	No
10. Related directive(s)	No
11. The decision was taken by	Simple majority Number of positive votes: 10 Number of negative votes: 0 Number of abstentions: 10

## Decision CEN/TC 249 617/2016 taken on 2016-12-18

### Subject: CEN/TC 249 - Decision to skip the Formal Vote

CEN/TC 249 Plastics

1. considering the results of the Enquiry ballot;
2. considering the table of decisions and the formal written proposals as distributed after the comments decision meeting;
3. considering the CEN/CENELEC Internal Regulations - Part 2, clause 11.2.3;
4. considering Decisions BT 34/2002, BT 42/2003 and related document BT N 6962 concerning timeframes for the development of ENs;
5. considering Decision BT 35/2014 to associate a vote to the CEN Enquiry and to allow Technical Bodies to decide to skip the Formal Vote;
6. considering Decision 49/2014 to allow Technical Bodies to decide to skip the Formal Vote through a TC decision based on simple majority only;

decides to skip the Formal Vote and proceed with the publication of WI 00249976 - prEN ISO 29664 - Plastics - Artificial weathering including acidic deposition (ISO 29664:2010) (*In this case the TC must not finalize the publication, this will be done by CCMC. Instead the TC must notify CCMC of its intention to skip Formal Vote by posting only an electronic transmission notice onto eTrans.*)

The decision was taken by simple majority with 12 positive vote(s), 0 negative vote(s) and 7 abstention(s).

## 10 CEN/TC 250

### DECISION 434 taken by CEN/TC 250 on 2016-12-08

#### Subject: CEN/TC 250 – Re-appointment of CEN/TC 250/SC 3 Chairperson

CEN/TC 250 Structural Eurocodes,

- considering the CEN/CENELEC Internal Regulations - Part 2, sub clause 3.2.2, which lays down the rules for nomination, appointment and responsibilities of Chairpersons;
- noting the Chairman's briefing note 2016-1 on 'Re-appointment of Chairpersons and Convenors' (CEN/TC 250 N 1446) and ensuing endorsement by Members of CEN/TC 250 decision 422/2016 (CEN/TC 250 N 1514);
- - noting the nomination by the Technical Committee Secretariat;
- - noting the commitment of the professional standardization support from DIN;
- - noting the commitment of the applicant to the responsibilities and duties of a Subcommittee Chairperson as given in the CEN BOSS;

Decides to re-appoint Prof. Ulrike Kuhlmann as Chairperson of CEN/TC 250/SC 3 for a period of 3-years starting on 2016-11-15, noting that Prof. Kuhlmann has been Chairperson of the Subcommittee since October 2010.

The decision was taken by unanimity or simple majority with 19 positive votes, 0 negative vote(s) and 2 abstention(s).

## 11 CEN/TC 254

### Decision CEN/TC 254 505/2016 taken on 2016-10-14

#### Subject: Adoption of a New Work Item

##### CEN/TC 254 Flexible sheets for waterproofing

- having considered the proposal for a new work item as documented in CEN/TC 254 N 1596
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	The revision of an EN EN 13375:2004
3. Document developed in drafting body	CEN/TC 254/WG 6 - Bridge deck waterproofing
4. Title	Flexible sheets for waterproofing - Waterproofing of concrete bridge decks and other concrete surfaces trafficable by vehicles - Specimen preparation
5. Scope	This European standard is one of a series of standards dealing with the testing of flexible sheets for waterproofing of concrete bridge decks and other areas of concrete trafficable by vehicles. The European standard specifies: - the composition, the characteristics and the preparation procedure of the base specimen concrete slabs: - the composition, the characteristics and the preparation procedure of different bituminous mixes for the overlay; the rules for the

	preparation of specimens.
6. Environmental aspects	Other: not relevant
7. How do you plan to address these environmental aspects?	Other: not relevant
8. Vienna Agreement	No or expected CEN lead
9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	Yes M/124
12. Related directive(s)	Yes Directive reference   For citation in Official journal 305/2011   No
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: AENOR IPQ SFS AFNOR SIS ASI SIST SNV BSI UNI DIN NBN DS NEN UNMZ
14. The decision was taken by	Simple majority (min. 55% as from 2017-01-01) Number of positive votes: 12 Number of negative votes: 0 Number of abstentions: 8

## Decision CEN/TC 254 506/2016 taken on 2016-10-14

### Subject: Adoption of a New Work Item

#### CEN/TC 254 Flexible sheets for waterproofing

- having considered the proposal for a new work item as documented in CEN/TC 254 N 1597
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	The revision of an EN EN 14695:2010
3. Document developed in drafting body	CEN/TC 254/WG 6 - Bridge deck waterproofing
4. Title	Flexible sheets for waterproofing - Reinforced bitumen sheets for waterproofing of concrete bridge decks and other trafficked areas of concrete - Definitions and characteristics
5. Scope	This European Standard specifies characteristics and performance of reinforced bitumen sheets for waterproofing of concrete bridge decks and other trafficked areas of concrete where the waterproofing system is bonded to the concrete deck and overlaid by asphalt. The standard also specifies the test methods used for verifying the characteristics and performance.
6. Environmental aspects	Other: not relevant
7. How do you plan to address these environmental aspects?	Other: not relevant
8. Vienna Agreement	No or expected CEN lead
9. The project is linked to	No document from another organization

10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	Yes M/124
12. Related directive(s)	Yes Directive reference   For citation in Official journal 305/2011   No
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: AENOR IPQ SFS AFNOR SIS ASI SIST SNV BSI UNI DIN NBN DS NEN UNMZ
14. The decision was taken by	Simple majority (min. 55% as from 2017-01-01) Number of positive votes: 12 Number of negative votes: 0 Number of abstentions: 8

## **Decision CEN/TC 254 503/2016 taken on 2016-11-07**

### **Subject: Adoption of a Preliminary Work Item**

#### CEN/TC 254 Flexible sheets for waterproofing

- having considered the proposal for a new work item as documented in CEN/TC 254 N 1598
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

<b>Section</b>	<b>Details</b>
1. Deliverable	EN
2. This item corresponds to	The revision of an EN EN 13984:2013
3. Document developed in drafting body	CEN/TC 254/WG 9 - Underlays for discontinuous roof coverings
4. Title	Flexible sheets for waterproofing - Plastic and rubber vapour control layers - Definitions and characteristics
5. Scope	This European Standard specifies the characteristics of flexible sheets of plastic or rubber intended for use as water vapour control layers for buildings and applies to both reinforced and unreinforced products. It specifies requirements and test methods and provides for the evaluation of conformity of the products with the requirements of this European Standard.
6. Environmental aspects - OPTIONAL	
7. How do you plan to address these environmental aspects? - OPTIONAL	
8. Track	Enquiry + Formal Vote (ENQ+FV)
9. Related mandate(s)	Yes M/102
10. Related directive(s)	Yes Directive reference   For citation in Official journal 305/2011   No
11. The decision was taken by	Simple majority Number of positive votes: 10 Number of negative votes: 0 Number of abstentions: 12

## 12CEN/TC 278

### Decision CEN/TC 278 032/2016 taken on 2016-12-18

#### Subject: Adoption of a Preliminary Work Item

##### CEN/TC 278 - Intelligent transport systems

- having considered the proposal for a new work item as documented in CEN/TC 278 N 3432
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	TS
2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 278/WG 3 - Public transport (PT)
4. Title	Public transport - Interoperable fare management system - Back Office Interface
5. Scope	<p>This Work Item proposes to define an open and standardized interface between IFM system back offices, covering media centric, account based and hybrid ticketing architectures.</p> <p>Such open interface should cover at minima:</p> <ul style="list-style-type: none"> <li>• Exchange of action list: <ul style="list-style-type: none"> <li>o List of media for media centric oriented IFM systems</li> <li>o List of tokens for ABT oriented IFM systems</li> </ul> </li> <li>• Exchanges of travel entitlements <ul style="list-style-type: none"> <li>o for enabling passenger roaming between IFM systems</li> </ul> </li> <li>• Exchanges of taps <ul style="list-style-type: none"> <li>o For CICO (Check In Check Out) travels achieved across PT networks operated through several IFM systems</li> </ul> </li> <li>• Exchange of travel settlements <ul style="list-style-type: none"> <li>o For clearing travels made by roamers or achieved though several IFM systems</li> </ul> </li> </ul> <p>The scope of the project will need to be based on clearly stated use cases that should be defined as a first step.</p>

	<p>This work item will be handled in CEN TS278WG3 SG5 (IFM system). This work will leverage on Transmodel for the model of exchanged data and will liaise with CEN TC278WG3 SG4 (PT data model) experts when necessary. The Work Item group will also investigate if links are to be developed with the OpRa PWI (Operating raw data and statistics exchange).</p> <p>The regulatory and legal aspect will be integrated in the development of this work to cope with regards to user data privacy, responsibility of data storage, ownership of the exchanged data etc.</p> <p>NB: Equipment to back office interfaces are excluded from the scope of work</p>
6. Environmental aspects - OPTIONAL	Other: n/a
7. How do you plan to address these environmental aspects? - OPTIONAL	Other: n/a
8. Track	Vote on TS/TR by correspondence
9. Related mandate(s)	No
10. Related directive(s)	No
11. The decision was taken by	<p>Simple majority</p> <p>Number of positive votes: 9</p> <p>Number of negative votes: 0</p> <p>Number of abstentions: 11</p>

## 13 CEN/TC 308

### Decision CEN/TC 308 18/2016 taken on 2016-12-14

#### Subject: 3 year time-frame for the development of WI 00308110 - 9 month Tolerance Request.

CEN/TC 308 - Characterization and management of sludge

6. considering Resolution BT 34/2002 by which BT decided that any work item to result in an EN, registered after 2002-10-31, shall normally result in an EN after 3 years and set maximum times between well identified stages, as well as Resolution BT 42/2003 deciding on variant timeframes;
7. considering Resolution BT 42/2008 allowing the CEN/TCs, for well identified and justified reasons, to claim one tolerance of 9 months, applicable to the target dates for

submission of a draft to CCMC (or ISO/CS in case of Vienna Agreement & CEN Lead) for the relevant procedure(s) (i.e. CEN Enquiry and/or Formal Vote, UAP, TCA);

8. considering that for work item 00308110 - - *Characterization and management of sludge - Determination of Settling properties - Part 3 : Determination of zone settling velocity (ZSV)*, it proves impossible to Dispatch ENQ draft to CMC by 2017-03-07;
9. claims a tolerance of 9 months (i.e. a postponement of 9 months of the deadlines for all the stages not yet reached) for the following reasons:  
Due to the need to carry out validations of the methods and according to the availability of experts and for logistic reasons, validations will be organized on the week 13 th-17 th March 2017 in Agen together with WG1 meeting therefore 9 months tolerances are requested.
10. confirms that CEN/TC 308 will Dispatch ENQ draft to CMC (or ISO/CS in case of Vienna Agreement - CEN Lead) by 2017-12-07 at the latest.

The decision was taken by simple majority with 14 positive vote(s), 0 negative vote(s) and 7 abstention(s).

## **Decision CEN/TC 308 19/2016 taken on 2016-12-14**

### **Subject: 3 year time-frame for the development of WI 00308112 - 9 month Tolerance Request.**

CEN/TC 308 - Characterization and management of sludge

11. considering Resolution BT 34/2002 by which BT decided that any work item to result in an EN, registered after 2002-10-31, shall normally result in an EN after 3 years and set maximum times between well identified stages, as well as Resolution BT 42/2003 deciding on variant timeframes;
12. considering Resolution BT 42/2008 allowing the CEN/TCs, for well identified and justified reasons, to claim one tolerance of 9 months, applicable to the target dates for submission of a draft to CCMC (or ISO/CS in case of Vienna Agreement & CEN Lead) for the relevant procedure(s) (i.e. CEN Enquiry and/or Formal Vote, UAP, TCA);
13. considering that for work item 00308112 - - *Evaluation of sludge density*, it proves impossible to Dispatch ENQ draft to CMC by 2017-05-07;
14. claims a tolerance of 9 months (i.e. a postponement of 9 months of the deadlines for all the stages not yet reached) for the following reasons:  
Due to the need to carry out validations of the methods and according to the availability of experts and for logistic reasons, validations will be organized on the week 13 th-17 th March 2017 in Agen together with WG1 meeting therefore 9 months tolerances are requested.
15. confirms that CEN/TC 308 will Dispatch ENQ draft to CMC (or ISO/CS in case of Vienna Agreement - CEN Lead) by 2018-02-07 at the latest.

The decision was taken by simple majority with 14 positive vote(s), 0 negative vote(s) and 7 abstention(s).

## 14 CEN/TC 391

### Decision CEN/TC 391 36/2016 taken on 2016-12-23

#### Subject: Activation of preliminary Work Item 00391012

##### CEN/TC 391 - Societal and Citizen Security

- having considered the proposal for the activation of work item 00391012 currently registered at preliminary stage 00.60 as documented in CEN/TC 391 N 381
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	TS
2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 391/WG 1 - Healthcare Facilities
4. Title	Societal security - Guidance for the security of CBRNE substances for healthcare facilities along their lifecycle
5. Scope	This Technical Specification provides guidance for the security of CBRNE substances for healthcare facilities along their lifecycle. This Technical Specification supplies an analysis of threats that may derive from CBRNE substances in healthcare facilities (HCFs) and takes into account the threats along the lifecycle of such substances, the effectiveness and performance of existing equipment and processes. Based on this analysis it will deliver guidance to mitigate the risks. This Technical Specification supports security managers of HCFs in their daily work.
6. Environmental aspects	Radiation Use of materials
7. How do you plan to address these environmental	Use of environmental checklist

aspects?	
8. Vienna Agreement	No or expected CEN lead
9. The project is linked to	No document from another organization
10. Track	Vote on TS/TR by correspondence
11. Related mandate(s)	No
12. Related directive(s)	No
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: ASI UNI DIN NEN UNMZ NQIS/ELOT
14. The decision was taken by	Weighted vote and simple majority Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):93 Number of positive votes: 9 Number of negative votes: 1 Number of abstentions: 7

## 15 CEN/TC 452

### DECISION 2 taken by CEN/TC 452 on 2016-12-13

#### Subject: CEN/TC 452 – Appointment of Chairperson

CEN/TC 452 Assistance Dog & Guide Dog Teams Standards and Instructors Competences,

- considering the CEN/CENELEC Internal Regulations - Part 2, subclause 3.2.2, which lays down the rules for nomination, appointment and responsibilities of Chairpersons;
- noting the nomination by the Technical Committee Secretariat, HZN
- noting the commitment of the applicant to the responsibilities and duties of a Technical Committee Chairperson as given in the CEN BOSS;

decides to appoint Ph.D. Marijan Alfonzo Sesar as Chairperson of CEN/TC452 for a period of 3 years starting on 2016-12-13

The decision was taken by unanimity.
