1 CEN/TC 58

Decision CEN/TC 58 M12/2016 taken on 2016-04-21

Subject: Activation of preliminary Work Item 00058073 - prEN 88-3

CEN/TC 58 - Safety and control devices for burners and appliances burning gaseous or liquid fuels

- having considered the proposal for the activation of work item 00058073 currently registered at preliminary stage 00.60 as documented in CEN/TC 58 N 1800
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available

- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 58/WG 13 - Mechanics
4. Title	Safety and control devices for gas burners and gas burning appliances - Part 3: Pressure and/or flow rate regulators for inlet pressures up to and including 500 kPa, electronic types
5. Scope	<p>This European Standard specifies the safety, construction and performance requirements for electronic pressure regulators and safety devices, intended for use with gas burners, gas appliances and similar use, hereafter referred to as -pressure regulators-</p> <p>This European Standard is applicable to:</p> <ul style="list-style-type: none"> - pressure regulators with declared maximum inlet pressure up to and including 500 kPa, of nominal connection size up to and including DN 250 for use with one or more fuel gases in accordance with EN 437, - pressure regulators incorporating safety devices, - pressure regulators incorporating safety devices specified as safety accessories, <p>NOTE For safety accessories and pressure accessories, the requirements of prEN 13611:2012, Annex F also apply.</p> <ul style="list-style-type: none"> - pressure regulators which use auxiliary energy, <p>Pressure regulators intended to be used on pipe work installations for third family gases are also covered by EN 13785 and EN 13786.</p> <p>This European Standard is not applicable to:</p> <ul style="list-style-type: none"> - pressure regulators that are connected directly to mains pipe-work or to a container that maintains a standard distribution pressure, - pressure regulators intended for gas appliances to be installed in the open air and exposed to the environment, - safety devices which use auxiliary energy - electronic gas/air ratio controls (EN 12067-2).
6. Environmental aspects	Use of energy Use of materials
7. How do you plan to address these environmental aspects?	Use of environmental checklist
8. Vienna Agreement	No or expected CEN lead
9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)

11. Related mandate(s)	Yes M/BC/CEN/89/6
12. Related directive(s)	Yes Directive reference For citation in Official journal 2009/142/EC Yes
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: AFNOR BSI DIN NBN UNI NEN
14. The decision was taken by	Weighted vote and simple majority Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):100 Number of positive votes: 8 Number of negative votes: 0 Number of abstentions: 0

2 CEN/TC 88

Decision CEN/TC 88 718c/2016 taken on 2016-03-23

Subject: Adoption of a New Work Item

CEN/TC 88 - Thermal insulating materials and products

- having considered the proposal for a new work item as documented in CEN/TC 88 N 3453
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	A new project

3. Document developed in drafting body	CEN/TC 88/WG 2 - Coordinating group
4. Title	Thermal insulation products for buildings - Factory made composite products - Specification
5. Scope	<p>This European standard specifies the requirements for factory made composite products to be used for thermal insulation of buildings, such as composite insulation products with at least two different thermal insulation layers and with or without facings or coatings, and composite products with thermal insulation layer/s bonded to additional external layer/s of non-insulation products.</p> <p>Products defined by standards EN 13162 to 13171 and prEN 16069 shall be used for the thermal insulation layers. If a product other than those defined in above standards is used as one of the thermal insulation layers, then its properties declared for the composite shall be assessed according to test methods and principles in above mentioned standards.</p> <p>This standard does not cover the performance of prefabricated systems incorporating these composite products.</p> <p>This standard specifies product characteristics and includes procedures for testing, evaluation of conformity, marking and labelling.</p> <p>This standard does not specify the required level of a given property to be achieved by a product to demonstrate fitness for purpose in a particular application. The levels required for a given application are to be found in regulations or non-conflicting standards.</p> <p>Self-supporting building products and products for structural use are not covered by this standard.</p> <p>This standard does not cover in-situ composite insulation products, composite products for civil engineering applications and composite products intended to be used for thermal insulation of building equipment and industrial installations.</p>
6. Environmental aspects	Use of energy
7. How do you plan to address these environmental aspects?	Bring in environmental expertise to the WG Use of environmental checklist
8. Vienna Agreement	No or expected CEN lead
9. The project is linked to	No document from another organization

10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	Yes M/103 rev
12. Related directive(s)	Yes Directive reference For citation in Official journal 305/2011 Yes
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: AFNOR BSI DIN NBN NEN UNMS UNMZ
14. The decision was taken by	Weighted vote and simple majority Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):100 Number of positive votes: 13 Number of negative votes: 0 Number of abstentions: 5

3 CEN/TC 114

Decision CEN/TC 114 C 385/2017 taken on 2017-01-16

Subject: Adoption of a New Work Item

CEN/TC 114 - Safety of machinery

- having considered the proposal for a new work item as documented in CEN/TC 114 N 1635
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN

2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 114 - Safety of machinery
4. Title	Safety of machinery - Instruction handbook - General drafting principles
5. Scope	This European Standard specifies requirements for the machine manufacturer on drafting an instruction handbook. This International Standard provides added value to the general requirements on information for use given in EN ISO 12100:2010, 6.4, and deals with the safety-related content, the corresponding structure and presentation of the instruction handbook, taking into account the whole lifecycle of the machine. If an instruction handbook is required, this International Standard establishes the principles which are indispensable, to avoid a lack of information in particular those on possible residual risks. This International Standard is applicable for preparation of an instruction handbook of machinery.
6. Environmental aspects	None of the above: The document gives drafting instructions only.
7. How do you plan to address these environmental aspects?	Other: Not relevant
8. Vienna Agreement	Yes - Parallel ISO lead ISO project reference: ISO/WD 20607 ISO project ID: 68519 ISO TC: ISO/TC 199
9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	Yes M/396
12. Related directive(s)	Yes Directive reference For citation in Official journal 2006/42/EC Yes
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: SFS SIS BSI SNV DIN DS
14. The decision	Weighted vote and simple majority

was taken by	Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):84.5 Number of positive votes: 11 Number of negative votes: 1 Number of abstentions: 7
--------------	--

4 CEN/TC 129

Decision CEN/TC 129 518/2016 taken on 2017-01-10

Subject: Adoption of a New Work Item

CEN/TC 129 Glass in building

- having considered the proposal for a new work item as documented in CEN/TC 129 N 1188
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 129/WG 8 - Mechanical strength
4. Title	Glass in building - Laminated glass and laminated safety glass - Determination of interlayer mechanical properties
5. Scope	This standard specifies a test method for determining the mechanical viscoelastic properties of interlayer materials. The interlayers under examination are those used in the production of laminated glass and/or laminated safety glass. The interlayer properties are needed in order to determine the load resistance of laminated glass in accordance with prEN 16612 [1]. From the tensile modulus in particular conditions of temperature and load duration, an interlayer can be placed into a family that relates to a specific interlayer shear transfer coefficient, $\bar{\mu}$ used in the simplified calculation method described in prEN 16612 [1].

	An informative annex explains the background to the determination of families relating to a specific interlayer shear transfer coefficient.
6. Environmental aspects	None of the above: Not relevant
7. How do you plan to address these environmental aspects?	Bring in environmental expertise to the WG
8. Vienna Agreement	No or expected CEN lead
9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	Yes M/135
12. Related directive(s)	Yes Directive reference For citation in Official journal 305/2011 No
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: AFNOR BSI DIN NBN UNI IPQ
14. The decision was taken by	Weighted vote and simple majority Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):99 Number of positive votes: 15 Number of negative votes: 1 Number of abstentions: 5

Decision CEN/TC 129 532/2016 taken on 2017-01-10

Subject: Adoption of a New Work Item

CEN/TC 129 - Glass in building

- having considered the proposal for a new work item as documented in CEN/TC 129 N 1185
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope

- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 129/WG 8 - Mechanical strength
4. Title	Glass in building - Determination of the lateral load resistance of glass panes by calculation
5. Scope	<p>This European Standard gives the principles of determining the design value of the bending strength of glass. It gives: the general method of calculation, and guidance for lateral load resistance of linearly supported glazed elements</p> <p>NOTE Examples of lateral loads are wind loads and snow loads and self weight of sloping glass.</p> <p>This European Standard does not determine suitability for purpose. Resistance to lateral loads is only one part of the design process, which may also need to take into account:</p> <ul style="list-style-type: none"> - in-plane loading, buckling, lateral torsional buckling, and shear forces - environmental factors (e.g. sound insulation, thermal properties), - safety characteristics (e.g. fire performance, breakage characteristics in relation to human safety, security) <p>This European Standard does not apply to channel shaped glass.</p>
6. Environmental aspects	None of the above: Not relevant
7. How do you plan to address these environmental aspects?	Bring in environmental expertise to the WG
8. Vienna Agreement	No or expected CEN lead
9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	Yes M/135

12. Related directive(s)	Yes Directive reference For citation in Official journal 305/2011 No
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: AFNOR SN BSI DIN NBN UNI IPQ
14. The decision was taken by	Weighted vote and simple majority Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):95 Number of positive votes: 15 Number of negative votes: 2 Number of abstentions: 3

5 CEN/TC 136

Decision CEN/TC 136 C27/2016 taken on 2017-01-04

CEN/TC 136 Sports, playground and other recreational facilities and equipment

- having considered the proposal for the activation of work item 00136323 currently registered at preliminary stage 00.60 as documented in CEN/TC 136 N 2475
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	The revision of an EN EN 15288-1:2008+A1:2010
3. Document developed in drafting body	CEN/TC 136/WG 8 - Swimming pools

4. Title	Swimming pools - Part 1: Safety requirements for design
5. Scope	This European Standard specifies safety requirements relevant to certain aspects of design and construction of classified pools according to Clause 4. It is intended for those who are concerned with construction, planning and operation of classified swimming pools. It provides guidance about the risks associated by identifying the design characteristics required for a safe environment. The requirements of this European Standard are applicable to all new classified pools and, as appropriate, to specific refurbishments of classified existing pools. This European Standard has limited application to classified pools which consist of segregated areas of rivers, lakes or the sea but should be followed where relevant.
6. Environmental aspects	Use of materials
7. How do you plan to address these environmental aspects?	Use of environmental checklist
8. Vienna Agreement	No or expected CEN lead
9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	No
12. Related directive(s)	No
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: AFNOR SFS SN BSI DIN UNI NEN NQIS/ELOT
14. The decision was taken by	Simple majority (min. 55% as from 2017-01-01) Number of positive votes: 14 Number of negative votes: 0 Number of abstentions: 9

Decision CEN/TC 136 C28/2016 taken on 2017-01-04

CEN/TC 136 Sports, playground and other recreational facilities and equipment

- having considered the proposal for the activation of work item 00136326 currently registered at preliminary stage 00.60 as documented in CEN/TC 136 N 2476
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	The revision of an EN EN 15288-2:2008
3. Document developed in drafting body	CEN/TC 136/WG 8 - Swimming pools
4. Title	Swimming pools - Part 2: Safety requirements for operation
5. Scope	This European Standard specifies safety requirements for operating of classified pools according to clause 4. It is intended for those concerned with the operation and management of classified swimming pools. It provides guidance about the risks for staff and users associated with public swimming pools, by identifying the precautions needed to achieve safety. This European Standard has limited application to classified pools which consist of segregated areas of rivers, lakes or the sea. The requirements for safe working methods and supervision should be followed insofar as they are relevant.
6. Environmental aspects	Use of materials
7. How do you plan to address these environmental aspects?	Use of environmental checklist
8. Vienna Agreement	No or expected CEN lead
9. The project is linked to	No document from another organization

10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	No
12. Related directive(s)	No
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: AFNOR SFS SN BSI DIN UNI NEN NQIS/ELOT
14. The decision was taken by	Simple majority (min. 55% as from 2017-01-01) Number of positive votes: 13 Number of negative votes: 0 Number of abstentions: 10

Decision CEN/TC 136 C24/2016 taken on 2017-01-08

Subject: Adoption of a New Work Item

CEN/TC 136 Sports, playground and other recreational facilities and equipment

- having considered the proposal for a new work item as documented in CEN/TC 136 N 2471
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	The revision of an EN EN 957-2:2003
3. Document developed in drafting	CEN/TC 136/WG 4 - Stationary training equipment

body	
4. Title	Stationary training equipment - Part 2: Strength training equipment, additional specific safety requirements and test methods
5. Scope	<p>This part of ISO 20957 specifies additional safety requirements for strength training equipment in addition to the general safety requirements of ISO 20957-1.</p> <p>This part of ISO 20957 is applicable to stationary training equipment type strength training equipment with stack weight resistance or other means of resistance like weight discs, elastic cords, hydraulic, pneumatic and magnetic systems, springs and electrical resistance (type 2) (hereinafter referred to as training equipment) with the classes H, S and I according to ISO 20957-1.</p> <p>Any attachments provided with the training equipment for the performance of additional exercises are subject to the requirements of ISO 20957-1.</p>
6. Environmental aspects	Use of materials
7. How do you plan to address these environmental aspects?	Use of environmental checklist
8. Vienna Agreement	No or expected CEN lead
9. The project is linked to	<p>An ISO document</p> <p>Identical</p> <p>ISO project reference: 20957-2</p> <p>Issue year: 2005</p> <p>ISO project ID: 39904</p>
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	<p>Yes</p> <p>M/506</p>
12. Related directive(s)	<p>Yes</p> <p>Directive reference For citation in Official journal</p> <p>2001/95/EC No</p>
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project:
14. The decision was taken by	<p>Simple majority (min. 55% as from 2017-01-01)</p> <p>Number of positive votes: 10</p> <p>Number of negative votes: 0</p> <p>Number of abstentions: 12</p>

Decision CEN/TC 136 C25/2016 taken on 2017-01-08

Subject: Adoption of a New Work Item

CEN/TC 136 Sports, playground and other recreational facilities and equipment

- having considered the proposal for a new work item as documented in CEN/TC 136 N 2472
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	The revision of an EN EN 957-7:1998
3. Document developed in drafting body	CEN/TC 136/WG 4 - Stationary training equipment
4. Title	Stationary training equipment - Part 7: Rowing machines, additional specific safety requirements and test methods
5. Scope	This part of ISO 20957 specifies safety requirements for rowing equipment in addition to the general safety requirements of ISO 20957-1 and should be read in conjunction with it. This part of ISO 20957 is applicable to rowing type stationary training equipment, hereinafter referred to as rowing equipment, within the classes H, S and I as well as classes A, B and C regarding accuracy. Any attachment provided with the rowing equipment for the performance of additional exercises are subject to the requirements of ISO 20957-1 and any other specific requirements of the appropriate part of this standard.
6. Environmental aspects	Use of materials
7. How do you plan to address these environmental aspects?	Use of environmental checklist
8. Vienna Agreement	No or expected CEN lead

9. The project is linked to	An ISO document Identical ISO project reference: 20957-7 Issue year: 2005 ISO project ID: 39908
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	Yes M/506
12. Related directive(s)	Yes Directive reference For citation in Official journal 2001/95/EC No
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project:
14. The decision was taken by	Simple majority (min. 55% as from 2017-01-01) Number of positive votes: 10 Number of negative votes: 0 Number of abstentions: 12

6 CEN/TC 142

Decision CEN/TC 142 33/2016 taken on 2017-01-16

Subject: Adoption of a Preliminary Work Item

CEN/TC 142 - Woodworking machines - Safety

- having considered the proposal for a new work item as documented in CEN/TC 142 N 1356
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	A new project
3. Document	CEN/TC 142 - Woodworking machines - Safety

developed in drafting body	
4. Title	Woodworking machines Safety Part 15 Presses and bending presses
5. Scope	This document deals with all significant hazards, hazardous situations and events as listed in Clause 4, which are relevant to presses used to laminate, bend and/or join together flat panels consisting of solid wood and wood based materials such as chipboard, fibreboard, plywood or to assembly and/or shape solid wood and wood based materials such as MDF and plywood, hereinafter referred to as "machines", when they are used as intended and under the conditions foreseen by the manufacturer including reasonably foreseeable misuse. Pressing force is applied between two flat or shaped surfaces by actuators pushing top and bottom surfaces against each other, moving one of them. Loading and/or unloading is manual and gluing and/or shaping process is cold.
6. Environmental aspects - OPTIONAL	
7. How do you plan to address these environmental aspects? - OPTIONAL	
8. Track	Enquiry + Formal Vote (ENQ+FV)
9. Related mandate(s)	Yes M/396
10. Related directive(s)	Yes Directive reference For citation in Official journal 2006/42/EC Yes
11. The decision was taken by	Simple majority Number of positive votes: 7 Number of negative votes: 1 Number of abstentions: 9

7 CEN/TC 144

DECISION 621 taken by CEN/TC 144 on 2016-12-06

Subject: CEN/TC 144 – Appointment of Chairperson

CEN/TC 144 - Tractors and machinery for agriculture and forestry

- considering the CEN/CENELEC Internal Regulations - Part 2, subclause 3.2.2, which lays down the rules for nomination, appointment and responsibilities of Chairpersons;
- noting the nomination by the Technical Committee Secretariat;
- noting the commitment of the applicant to the responsibilities and duties of a Technical Committee Chairperson as given in the CEN BOSS;

decides to support the nomination of Mr Guillaume BOCQUET (AXEMA, France) as Chairman of CEN/TC 144 for a period of 6 years starting on 2017-01-01;

thanks M. GOUPILLON for his excellent chairmanship.

8 CEN/TC 162

Decision CEN/TC 162 445/2016 taken on 2017-01-06

Subject: Adoption of a Preliminary Work Item

CEN/TC 162 - Protective clothing including hand and arm protection and lifejackets

- having considered the proposal for a new work item as documented in CEN/TC 162 N 3608
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN

2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 162/WG 2 - Resistance to heat and fire of protective clothing
4. Title	Protective Clothing - Protection against heat and flame - Method of test for evaluation of materials and material assemblies when exposed to radiant heat in both wet and dry conditions
5. Scope	A European Standard specifying a new test method/procedure to address Low Radiant Heat Flux of Protective Garments, both wet & dry.
6. Environmental aspects - OPTIONAL	None of the above: Standard deals with PPE.
7. How do you plan to address these environmental aspects? - OPTIONAL	Use of environmental checklist
8. Track	Enquiry + Formal Vote (ENQ+FV)
9. Related mandate(s)	No
10. Related directive(s)	No
11. The decision was taken by	Simple majority Number of positive votes: 10 Number of negative votes: 2 Number of abstentions: 10

9 CEN/TC 207

Decision CEN/TC 207 645/2016 taken on 2017-01-08

Subject: 3 year time-frame for the development of WI 00207258 - 9 month Tolerance Request.

CEN/TC 207 Furniture

1. considering Resolution BT 34/2002 by which BT decided that any work item to result in an EN, registered after 2002-10-31, shall normally result in an EN after 3 years and set maximum times between well identified stages, as well as Resolution BT 42/2003 deciding on variant timeframes;
2. considering Resolution BT 42/2008 allowing the CEN/TCs, for well identified and justified reasons, to claim one tolerance of 9 months, applicable to the target dates for submission of a draft to CCMC (or ISO/CS in case of Vienna Agreement - CEN Lead) for the relevant procedure(s) (i.e. CEN Enquiry and/or Formal Vote, UAP, TCA);
3. considering that for work item *00207258 - prEN 15939 - Hardware for furniture - Strength and loading capacity of wall attachment*, it proves impossible to Dispatch FV draft to CMC by 2017-02-15;
4. claims a tolerance of 9 months (i.e. a postponement of 9 months of the deadlines for all the stages not yet reached) for the following reasons:
Huge amount of comments received during CEN Enquiry
5. confirms that CEN/TC 207 will Dispatch FV draft to CMC (or ISO/CS in case of Vienna Agreement - CEN Lead) by 2017-11-15 at the latest.

The decision was taken by simple majority with 13 positive vote(s), 0 negative vote(s) and 7 abstention(s).

Decision CEN/TC 207 646/2016 taken on 2017-01-08

Subject: Deletion of a Work Item neither mandated nor covered by an Order Voucher

CEN/TC 207 Furniture

1. having received and agreed upon the reasons why harmonization is no longer needed;
2. considering that the work item(s) are neither mandated nor covered by an Order Voucher;
3. noting the consequences of release of standstill;

decides to delete the following work item(s):

WI 00207266 prEN 15706 rev - Hardware for furniture - Strength and durability of slide fittings for sliding doors and roll fronts

and decides to release the standstill on these work item(s).

The decision was taken by simple majority with 13 positive vote(s), 0 negative vote(s) and 7 abstention(s).

Decision CEN/TC 207 647/2016 taken on 2017-01-08

Subject: Adoption of a Preliminary Work Item

CEN/TC 207 Furniture

- having considered the proposal for a new work item as documented in CEN/TC 207 N
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	The revision of an EN EN 15338:2007+A1:2010
3. Document developed in drafting body	CEN/TC 207/WG 8 - Requirements and test methods for hardware for furniture
4. Title	Hardware for furniture - Strength and durability of extension elements and their components
5. Scope	This European Standard specifies test methods and requirements for the strength and durability of all types of extension elements and their components for all fields of application, except table extensions. The tests consist of the application of loads, forces and velocities simulating normal functional use, as well as misuse, that might reasonably be expected to occur. With the exception of the corrosion test in 6.4, the tests are designed to evaluate properties without regard to materials, design/construction or manufacturing processes. The strength and durability tests only relate to the extension elements and the parts used for the attachment, e.g. screws.

	<p>The strength and durability tests are carried out in a test frame with specified properties. The test results can only be used as a guide to the performance of a piece of furniture.</p> <p>The test results are only valid for the extension element tested. These results may be used to represent the performance of production models provided that the tested model is representative of the production model.</p> <p>Ageing and influences of heat and humidity are not included.</p>
6. Environmental aspects - OPTIONAL	
7. How do you plan to address these environmental aspects? - OPTIONAL	
8. Track	Enquiry + Formal Vote (ENQ+FV)
9. Related mandate(s)	No
10. Related directive(s)	No
11. The decision was taken by	<p>Simple majority</p> <p>Number of positive votes: 13</p> <p>Number of negative votes: 0</p> <p>Number of abstentions: 7</p>

Decision CEN/TC 207 N 648/2016 taken on 2017-01-16

Subject: CEN/TC 207 - Decision to launch a 2nd Enquiry on prEN 1022

CEN/TC 207 Furniture

- considering the table of decisions and the formal written proposals as distributed after the comments resolution meeting;
- considering the CEN/CENELEC Internal Regulations - Part 2, clause 11.2.3;
- considering Resolutions BT 34/2002, BT 42/2003 and related document BT N 6962 concerning timeframes for the development of ENs;

decides to launch a second Enquiry on WI 00207231 - prEN 1022 - Furniture - Seating - Determination of stability.

The decision was taken by simple majority with 14 positive vote(s), 0 negative vote(s) and 6 abstention(s).

10 CEN/TC 217

DECISION C 58/2016 taken by CEN/TC 217 on 2016-12-06

Subject: CEN/TC 217 – Participation of ESTO

The CEN/TC 217 Surfaces for sports areas,

- considering the CEN/CENELEC Internal Regulations - Part 2, subclause 4.3.2, which lays down the conditions for external liaisons;
- considering that the conditions laid down in CEN-CENELEC Guide 25 “The concept of partnership with European organizations and other stakeholders” are fulfilled;
- agrees to the participation of the European Synthetic Turf Organisation in CEN/TC 217;
- requests the CEN-CENELEC Management Centre to inform ESTO accordingly of this decision.

The decision was taken by *simple majority with 12 positive votes, 1 negative vote and 8 abstentions.*

11 CEN/TC 219

Decision CEN/TC 219 001/2017 taken on 2016-06-12

Subject: Adoption of a New Work Item

CEN/TC 219 - Cathodic protection

- having considered the proposal for a new work item as documented in CEN/TC 219 N 395
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	A new project

3. Document developed in drafting body	CEN/TC 219/WG 3 - Cathodic protection of steel structures in sea-water
4. Title	Cathodic protection of internal surfaces of metallic tanks, structures, equipment, and piping containing seawater
5. Scope	<p>This European Standard specifies the requirements and recommendations for cathodic protection systems applied to the internal surfaces of metallic tanks, structures, equipment, and piping containing raw or treated seawater or brackish waters to provide an efficient protection from corrosion.</p> <p>Cathodic protection inside fresh water systems is excluded from this standard. This is covered by EN 12499.</p> <p>NOTE EN 12499 covers internal cathodic protection for any kind of waters, including general aspects for seawater; but excluding industrial cooling water systems. The present European Standard specifically details applications in seawater and brackish waters.</p>
6. Environmental aspects	<p>Emissions to air</p> <p>Use of materials</p> <p>Discharges to water</p>
7. How do you plan to address these environmental aspects?	Other: To be determined by the WG
8. Vienna Agreement	No or expected CEN lead
9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	No
12. Related directive(s)	No
13. Commitment	<p>The following CEN members (at least five) are committed to participate in the development of the project:</p> <p>AFNOR BSI SNV DS UNI</p>
14. The decision was taken by	<p>Weighted vote and simple majority</p> <p>Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):100</p> <p>Number of positive votes: 12</p> <p>Number of negative votes: 0</p> <p>Number of abstentions: 9</p>

12CEN/TC 227

Decision CEN/TC 227 815/2017 taken on 2017-01-05

Subject: Adoption of a New Work Item

CEN/TC 227 - Road materials

- having considered the proposal for a new work item as documented in CEN/TC 227 N 2758
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	The revision of an EN EN 13880-7:2003
3. Document developed in drafting body	CEN/TC 227/WG 3 - Materials for concrete roads including joint fillers and sealants
4. Title	Hot applied joint sealants - Part 7: Function testing of joint sealants
5. Scope	This European Standard describes a function test for hot-applied joint sealants intended to be used in areas where the joints are subjected to combined conditions of temperature $\hat{\lambda}$ - 20 Å°C and crack joint movement $\hat{\lambda}$ 35 % in construction joints as well as in spontaneously formed cracks in road and airfield pavements.
6. Environmental aspects	Use of energy Use of materials Use of water
7. How do you plan to address these environmental aspects?	Bring in environmental expertise to the WG
8. Vienna Agreement	No or expected CEN lead

9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	Yes M/124
12. Related directive(s)	Yes Directive reference For citation in Official journal 305/2011 No
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: SIS DIN UNE DS UNI
14. The decision was taken by	Simple majority (min. 55% as from 2017-01-01) Number of positive votes: 15 Number of negative votes: 0 Number of abstentions: 8

13 CEN/TC 230

Decision CEN/TC 230 C574/2016 taken on 2016-12-15

Subject: Activation of Work Item 00230342

CEN/TC 230 Water analysis

- having considered the proposal for a new work item as documented in CEN/TC 230 N 1025
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	A new project

3. Document developed in drafting body	CEN/TC 230/WG 27 - Marine ecological methods
4. Title	Water quality – Guidance on analysis of mesozooplankton from marine and brackish water
5. Scope	This European standard specifies a procedure for analysing mesozooplankton in marine and brackish waters. The procedures comprise how to identify and enumerate zooplankton collected in nets which is utilized to estimate quantitative information on diversity, abundance and biomass with regard to spatial distribution and long-term temporal trends for a given body of water.
6. Environmental aspects	Other: This standard specifies a method to investigate environmental parameters.
7. How do you plan to address these environmental aspects?	Bring in environmental expertise to the WG
8. Vienna Agreement	No or expected CEN lead
9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	No
12. Related directive(s)	No
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: AFNOR SFS SN BSI DIN UNI
14. The decision was taken by	Weighted vote and simple majority Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):100 Number of positive votes: 14 Number of negative votes: 0 Number of abstentions: 8

14 CEN/TC 239

Decision CEN/TC 239 256/2016 taken on 2016-10-12

Subject: 3 year time-frame for the development of WI 00239044 - 9 month Tolerance Request.

CEN/TC 239 - Rescue systems

- considering Resolution BT 34/2002 by which BT decided that any work item to result in an EN, registered after 2002-10-31, shall normally result in an EN after 3 years and set maximum times between well identified stages, as well as Resolution BT 42/2003 deciding on variant timeframes;
- considering Resolution BT 42/2008 allowing the CEN/TCs, for well identified and justified reasons, to claim one tolerance of 9 months, applicable to the target dates for submission of a draft to CCMC (or ISO/CS in case of Vienna Agreement – CEN Lead) for the relevant procedure(s) (i.e. CEN Enquiry and/or Formal Vote, UAP, TCA);
- considering that for work item *00239044 - EN 13718-1:2014/prA1 - Medical vehicles and their equipment - Air ambulances - Part 1: Requirements for medical devices used in air ambulances*, it proves impossible to Dispatch ENQ draft to CMC by 2017-02-22;
- claims a tolerance of 9 months (i.e. a postponement of 9 months of the deadlines for all the stages not yet reached) for the following reasons:
The work depends on the results of the incubator transportation revision (revEN 13976 series). The revision is now almost finished so that WG 5 can take the results into consideration to amend EN 13718-1:2014.
- confirms that CEN/TC 239 will Dispatch ENQ draft to CMC (or ISO/CS in case of Vienna Agreement - CEN Lead) by 2017-11-22 at the latest.

The decision was taken by simple majority with 7 positive vote(s), 0 negative vote(s) and 2 abstention(s).

Decision CEN/TC 239 257/2016 taken on 2016-10-12

Subject: 3 year time-frame for the development of WI 00239045 - 9 month Tolerance Request.

CEN/TC 239 - Rescue systems

6. considering Resolution BT 34/2002 by which BT decided that any work item to result in an EN, registered after 2002-10-31, shall normally result in an EN after 3 years and set maximum times between well identified stages, as well as Resolution BT 42/2003 deciding on variant timeframes;

7. considering Resolution BT 42/2008 allowing the CEN/TCs, for well identified and justified reasons, to claim one tolerance of 9 months, applicable to the target dates for submission of a draft to CCMC (or ISO/CS in case of Vienna Agreement - CEN Lead) for the relevant procedure(s) (i.e. CEN Enquiry and/or Formal Vote, UAP, TCA);
8. considering that for work item 00239045 - EN 13718-2:2015/prA1 - *Medical vehicles and their equipment - Air ambulances - Part 2: Operational and technical requirements for air ambulances*, it proves impossible to Dispatch ENQ draft to CMC by 2017-03-30;
9. claims a tolerance of 9 months (i.e. a postponement of 9 months of the deadlines for all the stages not yet reached) for the following reasons:
The work depends on the results of the incubator transportation revision (revEN 13976 series). The revision is now almost finished so that WG 5 can take the results into consideration to amend EN 13718-2:2015.
10. confirms that CEN/TC 239 will Dispatch ENQ draft to CMC (or ISO/CS in case of Vienna Agreement - CEN Lead) by 2017-12-30 at the latest.

The decision was taken by simple majority with 7 positive vote(s), 0 negative vote(s) and 2 abstention(s).

15 CEN/TC 252

DECISION D 422/2017 taken by CEN/TC 252 on 2017-01-07

Subject: CEN/TC 252 – Participation of BCIA

The CEN/TC 252 Child use and care articles,

- considering the CEN/CENELEC Internal Regulations - Part 2, subclause 4.3.2, which lays down the conditions for external liaisons;
- considering that the conditions laid down in CEN-CENELEC Guide 25 “The concept of partnership with European organizations and other stakeholders” are fulfilled;
- agrees to the participation of the Baby Carrier Industry Alliance in CEN/TC 252;
- requests the CEN-CENELEC Management Centre to inform BCIA accordingly of this decision.

The decision was taken by *simple majority with 13 positive votes, 0 negative vote and 6 abstentions.*

16CEN/TC 261

Decision CEN/TC 261 N014/2016 taken on 2017-01-16

Subject: Adoption of a New Work Item

CEN/TC 261 Packaging

- having considered the proposal for a new work item as documented in CEN/TC 261 N 515
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 261/SC 5/WG 26 - Packages made from flexible materials (e.g. flexible plastics, plastic laminates, paper/board laminated, metal foil laminates, textiles)
4. Title	Packaging - Flexible aluminium tubes - Tube nozzles
5. Scope	This standard is applicable to flexible aluminum tubes. The aim of this standard is to fix dimensions of the tube nozzle including orifice and thread
6. Environmental aspects	None of the above: Refer to EN 13427 to EN 13432 (Harmonised standards)
7. How do you plan to address these environmental aspects?	Other: Not relevant
8. Vienna Agreement	No or expected CEN lead
9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related	No

mandate(s)	
12. Related directive(s)	No
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: AFNOR TSE DIN UNE UNI
14. The decision was taken by	Weighted vote and simple majority Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):100 Number of positive votes: 5 Number of negative votes: 0 Number of abstentions: 8

17 CEN/TC 278

Decision CEN/TC 278 033/2016 taken on 2016-12-18

Subject: Adoption of a New Work Item

CEN/TC 278 - Intelligent transport systems

- having considered the proposal for a new work item as documented in CEN/TC 278 N 3433
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	TR
2. This item corresponds to	A new TR
3. Document developed in drafting	CEN/TC 278/WG 3 - Public transport (PT)

body	
4. Title	Public transport - Interoperable fare management system - Bluetooth low energy ticketing use cases and guidelines
5. Scope	<p>The purpose of the Technical Report is to document and describe</p> <ul style="list-style-type: none"> - The areas of IFM where BLE can extend or substitute existing technologies like ISO/IEC14443 or NFC, - The limitations of BLE in terms of use in IFMS, - The essential use cases that could be supported by BLE and how these can coexist with the exiting IFM role models and system implementations. <p>Those aspects where international standardisation or coordination can lead to benefits should be identified. Existing implementations and specifications shall be considered. Only specifications that are following the WTO's Code of Good Practice for the Preparation, Adoption and Application of Standards may be referenced by this report.</p>
6. Environmental aspects	Other: n/a
7. How do you plan to address these environmental aspects?	Other: n/a
8. Vienna Agreement	No or expected CEN lead
9. The project is linked to	No document from another organization

18 CEN/TC 290

Decision CEN/TC 290 108/2017 taken on 2017-01-20

Subject: Adoption of a New Work Item

CEN/TC 290 - Dimensional and geometrical product specification and verification

- having considered the proposal for a new work item as documented in CEN/TC 290 N 660
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 290 - Dimensional and geometrical product specification and verification
4. Title	Geometrical product specifications (GPS) - Surface texture: Profile - Part 3: Specification operators
5. Scope	This part of ISO 21920 specifies the complete specification operator for surface texture (scale limited surfaces) by profile methods.
6. Environmental aspects	None of the above: Adoption of ISO 21920-3 under Vienna Agreement, ISO lead
7. How do you plan to address these environmental aspects?	Other: Adoption of ISO 21920-3 under Vienna Agreement, ISO lead
8. Vienna Agreement	Yes - Parallel ISO lead ISO project reference: ISO 21920-3 ISO project ID: 72228 ISO TC: ISO/TC 213
9. The project is linked to	No document from another organization

10. Track	Enquiry + Formal Vote (ENQ+FV)

12. Related directive(s)	No
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: AFNOR SIS BSI DIN UNI NQIS/ELOT
14. The decision was taken by	Weighted vote and simple majority Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):100 Number of positive votes: 14 Number of negative votes: 0 Number of abstentions: 6

19CEN/TC 449

Decision CEN/TC 449 17/2016 taken on 2016-12-01

Subject: Adoption of a Preliminary Work Item

CEN/TC 449 Quality of care for older people

- having considered the proposal for a new work item as documented in CEN/TC 449 N 0027, 0049
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item	A new project

corresponds to	
3. Document developed in drafting body	CEN/TC 449 - Quality of care for older people
4. Title	Quality of care for older people & services provided at home including assisted living facilities
5. Scope	<p>This European standard specifies requirements and recommendations for services provided to older people at home including assisted living facilities, based on the older person's individual needs and preferences in order to give them selfdetermination, participation and a safe and secure old age. The standard(s) covers services however they are financed. The type of services specified in this standard are health and social care services.</p> <p>The standard is to be used by the public or private provider to plan, lead and implement the service, as well as systematically evaluate and improve the service.</p> <p>The standard can be used during quality assurance, follow-up, evaluation and development of such services and can be used to provide basic information during procurement, education, self-assessment and certification/accreditation.</p> <p>The standard does not cover standardization of medical devices or clinical guidelines.</p>
6. Environmental aspects - OPTIONAL	Use of materials
7. How do you plan to address these environmental aspects? - OPTIONAL	Use of environmental checklist
8. Track	Enquiry + Formal Vote (ENQ+FV)
9. Related mandate(s)	No
10. Related directive(s)	No
11. The decision was taken by	<p>Simple majority</p> <p>Number of positive votes: 5</p> <p>Number of negative votes: 0</p> <p>Number of abstentions: 0</p>

20 CEN/TC 450

DECISION 3/2016 taken by CEN/TC 450 on 2016-11-21

Subject: CEN/TC 450 - Appointment of Chairperson

The CEN/TC 450 Patient involvement in person-centred care,

- considering the CEN/CENELEC Internal Regulations - Part 2, subclause 3.2.2, which lays down the rules for nomination, appointment and responsibilities of Chairpersons;
- noting the nomination by the Technical Committee Secretariat;
- noting the commitment of the applicant to the responsibilities and duties of a technical Committee Chairperson as given in the CEN BOSS;

decides to appoint *Axel Wolf* as Chairperson of CEN/TC 450 for a period of 6 years starting on 2016-11-01.

The decision was taken unanimously.
