

# CEN System - Delegated Decisions

## Dispatch 9:2017

1	CEN/CLC/TC 5.....	1
2	CEN/TC 79 .....	5
3	CEN/TC 153 .....	9
4	CEN/TC 197 .....	11
5	CEN/TC 227 .....	12
6	CEN/TC 239 .....	19
7	CEN/TC 248 .....	21
8	CEN/TC 250 .....	27
9	CEN/TC 254 .....	28
10	CEN/TC 264 .....	29
11	CEN/TC 290 .....	31
12	CEN/TC 301 .....	34
13	CEN/TC 332 .....	35
14	CEN/TC 442 .....	38

## 1 CEN/CLC/TC 5

Decision CEN/CLC/TC 5 C55/2017 taken on 2017-02-03

Subject: CEN/CLC/TC 5 - Decision to skip the Formal Vote

CEN/CLC/TC 5 Space

- considering the results of the Enquiry ballot;
- considering the table of decisions and the formal written proposals as distributed after the comments decision meeting;
- considering the CEN/CENELEC Internal Regulations - Part 2, clause 11.2.3;
- considering Decisions BT 34/2002, BT 42/2003 and related document BT N 6962 concerning timeframes for the development of ENs;
- considering Decision BT 35/2014 to associate a vote to the CEN Enquiry and to allow Technical Bodies to decide to skip the Formal Vote;
- considering Decision 49/2014 to allow Technical Bodies to decide to skip the Formal Vote through a TC decision based on simple majority only;

decides to skip the Formal Vote and proceed with the publication of WI JT005131 - prEN 16603-10-24 - Space engineering - Interface management (*In this case the TC must not finalize the publication, this will be done by CCMC. Instead the TC must notify CCMC of its intention to skip Formal Vote by posting only an electronic transmission notice onto eTrans.*)

The decision was taken by unanimity.

## Decision CEN/CLC/TC 5 C56/2017 taken on 2017-02-03

Subject: CEN/CLC/TC 5 - Decision to skip the Formal Vote

### CEN/CLC/TC 5 Space

- considering the results of the Enquiry ballot;
- considering the table of decisions and the formal written proposals as distributed after the comments decision meeting;
- considering the CEN/CENELEC Internal Regulations - Part 2, clause 11.2.3;
- considering Decisions BT 34/2002, BT 42/2003 and related document BT N 6962 concerning timeframes for the development of ENs;
- considering Decision BT 35/2014 to associate a vote to the CEN Enquiry and to allow Technical Bodies to decide to skip the Formal Vote;
- considering Decision 49/2014 to allow Technical Bodies to decide to skip the Formal Vote through a TC decision based on simple majority only;

decides to skip the Formal Vote and proceed with the publication of WI JT005132 - prEN 16603-50-15 - Space engineering - CANbus extension protocol (*In this case the TC must not finalize the publication, this will be done by CCMC. Instead the TC must notify CCMC of its intention to skip Formal Vote by posting only an electronic transmission notice onto eTrans.*)

The decision was taken by unanimity.

## Decision CEN/CLC/TC 5 C57/2017 taken on 2017-03-04

Subject: Activation of preliminary Work Item JT005090

### CEN/CLC/TC 5 Space

- having considered the proposal for the activation of work item JT005090 currently registered at preliminary stage 00.60 as documented in CEN/CLC/TC 5 N 483
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	A new project

3. Document developed in drafting body	CEN/CLC/TC 5/WG 1 - Navigation and positioning receivers for road applications
4. Title	Space - Use of GNSS-based positioning for road Intelligent Transport Systems (ITS) - Part 2: Assessment field tests for basic performances of GNSS-based positioning terminals
5. Scope	<p>EN 16803-2 will propose field testing procedures to assess the basic performances of any GNSS-based positioning terminal for a given use case described by an operational scenario. These tests will address Availability, Accuracy and Integrity of the positioning information, considering that there is no particular security attack during the operation. The type of test considered can be either pure field tests carried out on a specific test vehicle carrying the terminal and circulating on the road, or "Record and Replay" using real GNSS (and possibly other sensors) data recorded by a test vehicle on the road and replayed in a laboratory as inputs to the terminal.</p> <p>EN 16803-2 will also propose a method to develop PVT error models, already introduced in EN 16803-1 and which are necessary to apply the Sensitivity analysis described by this first EN.</p>
6. Environmental aspects	None of the above: This Work Item specifies the requirements for performance assessment tests and covers no environmental issues.
7. How do you plan to address these environmental aspects?	Contact EHD for help / support (cen.ehd@cencenelec.eu)
8. Vienna Agreement	No or expected CEN lead
9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	Yes M/496
12. Related directive(s)	No
13. Commitment	<p>The following CEN members (at least five) are committed to participate in the development of the project:</p> <p>AFNOR SN BSI DIN NBN UNI</p>
14. The decision was taken by	<p>Weighted vote and simple majority</p> <p>Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):100</p> <p>Number of positive votes: 5</p>

	Number of negative votes: 0 Number of abstentions: 12
--	--

## Decision CEN/CLC/TC 5 C58/2017 taken on 2017-03-04

Subject: Activation of preliminary Work Item JT005091

### CEN/CLC/TC 5 Space

- having considered the proposal for the activation of work item JT005091 currently registered at preliminary stage 00.60 as documented in CEN/CLC/TC 5 N 485
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/CLC/TC 5/WG 1 - Navigation and positioning receivers for road applications
4. Title	Space - Use of GNSS-based positioning for road Intelligent Transport Systems (ITS) - Part 3: Assessment field tests for security performances of GNSS-based positioning terminals
5. Scope	EN 16803-3 will propose field and $\hat{\lambda}$ Record and Replay $\hat{\lambda}$ procedures to assess the performances of GNSS-based positioning terminals submitted to RF attacks such as spoofing or jamming or non-intentional interferences, in terms of robustness to the attacks and capacity to detect and to mitigate them.
6. Environmental aspects	None of the above: This Work Item specifies the requirements for security aspects of performance assessment tests and covers no environmental issues.
7. How do you plan to address these environmental aspects?	Contact EHD for help / support (cen.ehd@cencenelec.eu)
8. Vienna Agreement	No or expected CEN lead

9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	Yes M/496
12. Related directive(s)	No
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: AFNOR SN BSI DIN NBN UNI
14. The decision was taken by	Weighted vote and simple majority Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):100 Number of positive votes: 6 Number of negative votes: 0 Number of abstentions: 11

## 2 CEN/TC 79

### Decision CEN/TC 79 C 342/2016 taken on 2016-04-29

#### Subject: Adoption of a New Work Item

#### CEN/TC 79 - Respiratory protective devices

- having considered the proposal for a new work item as documented in CEN/TC 79 N 725
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN

2. This item corresponds to	The revision of an EN EN 13274-7:2008
3. Document developed in drafting body	CEN/TC 79/WG 9 - Test methods and interpretation of CEN/TC 79 standards
4. Title	Respiratory protective devices - Methods of test - Part 7: Determination of particle filter penetration
5. Scope	This European Standard specifies the procedure for testing particle filter penetration for respiratory protective devices.
6. Environmental aspects	Use of materials
7. How do you plan to address these environmental aspects?	Use of environmental checklist
8. Vienna Agreement	No or expected CEN lead
9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	Yes M/BC/CEN/88/7
12. Related directive(s)	Yes Directive reference   For citation in Official journal 89/686/EEC   Yes
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: AFNOR BSI DIN UNE UNI NEN
14. The decision was taken by	Weighted vote and simple majority Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):93.75 Number of positive votes: 15 Number of negative votes: 1 Number of abstentions: 6

# Decision CEN/TC 79 13/2016 taken on 2016-05-12

## Subject: Adoption of a Preliminary Work Item

### CEN/TC 79 - Respiratory protective devices

- having considered the proposal for a new work item as documented in CEN/TC 79 N 750
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	The revision of an EN EN 13274-1:2001
3. Document developed in drafting body	CEN/TC 79/WG 9 - Test methods and interpretation of CEN/TC 79 standards
4. Title	Respiratory protective devices - Methods of test - Part 1: Determination of inward leakage and total inward leakage
5. Scope	This draft European Standard specifies the general procedure for determining: (i) the inward leakage of facepieces or (ii) inward leakage of respiratory protective devices (RPD), which is the total inward leakage excluding any filter penetration or (iii) total inward leakage of respiratory protective devices. Sample preparation, selection of test subjects, test procedure and the method of calculation of leakage are included. Two methods are described, one using an aerosol (sodium chloride aerosol) and one using a gas (sulfur hexafluoride).
6. Environmental aspects - OPTIONAL	
7. How do you plan to address these environmental aspects? - OPTIONAL	
8. Track	Enquiry + Formal Vote (ENQ+FV)
9. Related	Yes

mandate(s)	M/BC/CEN/88/7
10. Related directive(s)	Yes Directive reference   For citation in Official journal 89/686/EEC   Yes
11. The decision was taken by	Simple majority Number of positive votes: 8 Number of negative votes: 0 Number of abstentions: 0

## Decision CEN/TC 79 14/2016 taken on 2016-05-12

### Subject: Adoption of a Preliminary Work Item

#### CEN/TC 79 - Respiratory protective devices

- having considered the proposal for a new work item as documented in CEN/TC 79 N 750
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 79/WG 9 - Test methods and interpretation of CEN/TC 79 standards
4. Title	Respiratory protective devices - Methods of test - Part 9: Mechanical stress test
5. Scope	This part of EN 13274 specifies the method of test for the mechanical resistance and strength of components of respiratory protective devices.
6. Environmental aspects - OPTIONAL	
7. How do you plan to address these environmental	

aspects? - OPTIONAL	
8. Track	Enquiry + Formal Vote (ENQ+FV)
9. Related mandate(s)	Yes M/BC/CEN/88/7
10. Related directive(s)	Yes Directive reference   For citation in Official journal 89/686/EEC   Yes
11. The decision was taken by	Simple majority Number of positive votes: 8 Number of negative votes: 0 Number of abstentions: 0

### 3 CEN/TC 153

#### Decision CEN/TC 153 352/2017 taken on 2017-03-06

Subject: 3 year time-frame for the development of WI 00153187 - 9 month Tolerance Request.

#### CEN/TC 153 - Machinery intended for use with foodstuffs and feed

- considering Resolution BT 34/2002 by which BT decided that any work item to result in an EN, registered after 2002-10-31, shall normally result in an EN after 3 years and set maximum times between well identified stages, as well as Resolution BT 42/2003 deciding on variant timeframes;
- considering Resolution BT 42/2008 allowing the CEN/TCs, for well identified and justified reasons, to claim one tolerance of 9 months, applicable to the target dates for submission of a draft to CCMC (or ISO/CS in case of Vienna Agreement - CEN Lead) for the relevant procedure(s) (i.e. CEN Enquiry and/or Formal Vote, UAP, TCA);
- considering that for work item 00153187 - prEN 13378 - Pasta processing plant - Pasta presses - Safety and hygiene requirements, it proves impossible to Dispatch FV draft to CMC by 2017-04-14;
- claims a tolerance of 9 months (i.e. a postponement of 9 months of the deadlines for all the stages not yet reached) for the following reasons:  
The experts in the responsible working group in CEN/TC 153, WG 7, need additional time for the discussion of comments received during public enquiry and for the preparation of the formal vote draft.
- confirms that CEN/TC 153 will Dispatch FV draft to CMC (or ISO/CS in case of Vienna Agreement - CEN Lead) by 2018-01-14 at the latest.

The decision was taken by simple majority with 12 positive vote(s), 0 negative vote(s) and 9 abstention(s).

## Decision CEN/TC 153 353/2017 taken on 2017-03-06

Subject: 3 year time-frame for the development of WI 00153188 - 9 month Tolerance Request.

CEN/TC 153 - Machinery intended for use with foodstuffs and feed

- considering Resolution BT 34/2002 by which BT decided that any work item to result in an EN, registered after 2002-10-31, shall normally result in an EN after 3 years and set maximum times between well identified stages, as well as Resolution BT 42/2003 deciding on variant timeframes;
- considering Resolution BT 42/2008 allowing the CEN/TCs, for well identified and justified reasons, to claim one tolerance of 9 months, applicable to the target dates for submission of a draft to CCMC (or ISO/CS in case of Vienna Agreement & CEN Lead) for the relevant procedure(s) (i.e. CEN Enquiry and/or Formal Vote, UAP, TCA);
- considering that for work item 00153188 - prEN 13289 - Pasta processing plant - Dryers and coolers - Safety and hygiene requirements, it proves impossible to Dispatch FV draft to CMC by 2017-04-14;
- claims a tolerance of 9 months (i.e. a postponement of 9 months of the deadlines for all the stages not yet reached) for the following reasons:  
The experts in the responsible working group in CEN/TC 153, WG 7, need additional time for the discussion of comments received during public enquiry and for the preparation of the formal vote draft.
- confirms that CEN/TC 153 will Dispatch FV draft to CMC (or ISO/CS in case of Vienna Agreement - CEN Lead) by 2018-01-14 at the latest.

The decision was taken by simple majority with 12 positive vote(s), 0 negative vote(s) and 9 abstention(s).

## Decision CEN/TC 153 354/2017 taken on 2017-03-06

Subject: 3 year time-frame for the development of WI 00153189 - 9 month Tolerance Request.

CEN/TC 153 - Machinery intended for use with foodstuffs and feed

- considering Resolution BT 34/2002 by which BT decided that any work item to result in an EN, registered after 2002-10-31, shall normally result in an EN after 3 years and set maximum times between well identified stages, as well as Resolution BT 42/2003 deciding on variant timeframes;
- considering Resolution BT 42/2008 allowing the CEN/TCs, for well identified and justified reasons, to claim one tolerance of 9 months, applicable to the target dates for submission of a draft to CCMC (or ISO/CS in case of Vienna Agreement & CEN Lead) for the relevant procedure(s) (i.e. CEN Enquiry and/or Formal Vote, UAP, TCA);

- considering that for work item 00153189 - prEN 13379 - Pasta processing plant - Spreader, stripping and cutting machine, stick return conveyor - Safety and hygiene requirements, it proves impossible to Dispatch FV draft to CMC by 2017-04-14;
- claims a tolerance of 9 months (i.e. a postponement of 9 months of the deadlines for all the stages not yet reached) for the following reasons:  
The experts in the responsible working group in CEN/TC 153, WG 7, need additional time for the discussion of comments received during public enquiry and for the preparation of the formal vote draft.
- confirms that CEN/TC 153 will Dispatch FV draft to CMC (or ISO/CS in case of Vienna Agreement - CEN Lead) by 2018-01-14 at the latest.

The decision was taken by simple majority with 12 positive vote(s), 0 negative vote(s) and 9 abstention(s).

## 4 CEN/TC 197

### DECISION C10 taken by CEN/TC 197 on 06-03-2017

Subject: 3 year time-frame for the development of ENs, TRs and TSs – 9 month Tolerance Request

CEN/TC 197, pumps

- considering Resolution BT 34/2002 by which BT decided that any work item to result in an EN, registered after 2002-10-31, shall normally result in an EN after 3 years and set maximum times between well identified stages, as well as Resolution BT 42/2003 deciding on variant timeframes;
- considering Resolution BT 42/2008 allowing the CEN/TCs, for well identified and justified reasons, to claim *one* tolerance of *9 months*, applicable to the target dates for submission of a draft to CCMC (or ISO/CS in case of Vienna Agreement – CEN Lead) for the relevant procedure(s) (i.e. CEN Enquiry and/or Formal Vote, UAP, TCA);
- considering that for work item 00197092 - prEN ISO 2036, *Liquid pumps and pump units - Noise test code - Grades 2 and 3 of accuracy*, it proves impossible to provide a draft for *CEN Enquiry* by 15-02-2017;
- claims a tolerance of 9 months (i.e. a postponement of 9 months of the deadlines for all the stages not yet reached) for the following reasons: *the draft is not ready*;
- confirms that a draft will be sent to CCMC (or ISO/CS in case of Vienna Agreement – CEN Lead) for submission to *CEN Enquiry* by 15-10-2017 at the latest.

The decision was taken by 10 positive votes, 0 negative votes and 7 abstentions

## 5 CEN/TC 227

### Decision CEN/TC 227 821/2017 taken on 2017-03-06

#### Subject: Adoption of a Preliminary Work Item

##### CEN/TC 227 - Road materials

- having considered the proposal for a new work item as documented in CEN/TC 227 N 2783
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	The revision of an EN EN 12271:2006
3. Document developed in drafting body	CEN/TC 227/WG 2 - Surface Dressing, Sprays and Slurry Surfacing (incorporating Microsurfacing)
4. Title	Surface dressing - Requirements
5. Scope	<p>This European Standard describes the performance requirements and control procedures for the installation of surface dressing as a product for the surface treatment of roads and other trafficked areas.</p> <p>This European Standard does not apply to surface dressings designed by the purchaser.</p> <p>This European Standard is not applicable to surface dressings carried out in tunnels and where fire regulations apply.</p> <p>This European Standard does not apply to small areas of surface dressing on roads that are less than 500 m<sup>2</sup> which are not contiguous (for example patch repair surface dressing especially when carried out manually).</p> <p>This European Standard does not apply to aircraft pavements that are covered by international regulations, for example, International Civil Aviation Organization (ICAO) regulations (airfields).</p>
6. Environmental aspects - OPTIONAL	
7. How do you plan to address these	

environmental aspects? - OPTIONAL	
8. Track	Enquiry + Formal Vote (ENQ+FV)
9. Related mandate(s)	Yes M/124
10. Related directive(s)	Yes Directive reference   For citation in Official journal 305/2011   No
11. The decision was taken by	Simple majority Number of positive votes: 17 Number of negative votes: 0 Number of abstentions: 7

## Decision CEN/TC 227 822/2017 taken on 2017-03-06

### Subject: Adoption of a Preliminary Work Item

#### CEN/TC 227 - Road materials

- having considered the proposal for a new work item as documented in CEN/TC 227 N 2783
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	The revision of an EN EN 12272-1:2002
3. Document developed in drafting body	CEN/TC 227/WG 2 - Surface Dressing, Sprays and Slurry Surfacing (incorporating Microsurfacing)
4. Title	Surface dressing - Test methods - Part 1: Rate of spread and accuracy of spread of binder and chippings
5. Scope	This European Standard specifies test methods for determining the rates of spread and accuracy of spread of binder and chippings of a surface dressing on a section of road at a given time. It is also applicable to surface dressings on airfields and other trafficked areas.

	The test methods are used on site to check the ability of binder sprayers and chipping spreaders to meet the intended rates of spread and tolerances and coefficients of variation. The test methods for measuring the rates of spread and accuracy of spread of binders and chippings are not applicable to combined chipping-binder spreaders.
6. Environmental aspects - OPTIONAL	
7. How do you plan to address these environmental aspects? - OPTIONAL	
8. Track	Enquiry + Formal Vote (ENQ+FV)
9. Related mandate(s)	No
10. Related directive(s)	Yes Directive reference   For citation in Official journal 305/2011   No
11. The decision was taken by	Simple majority Number of positive votes: 16 Number of negative votes: 0 Number of abstentions: 8

## Decision CEN/TC 227 831/2017 taken on 2017-03-06

### Subject: Adoption of a Preliminary Work Item

#### CEN/TC 227 Road materials

- having considered the proposal for a new work item as documented in CEN/TC 227 N 2783
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN

2. This item corresponds to	The revision of an EN EN 12272-2:2003
3. Document developed in drafting body	CEN/TC 227/WG 2 - Surface Dressing, Sprays and Slurry Surfacing (incorporating Microsurfacing)
4. Title	Surface dressing - Test methods - Part 2: Visual assessment of defects
5. Scope	This European Standard specifies methods of assessment of the defects which may occur with a surface dressing. The assessment of the defects evaluates the condition or performance of the surface dressing and, thus, gives an indication on the durability of the surface dressing. This standard is applicable to all surface dressings (roads, airfields and other trafficked areas). The checklist in Annex A (normative) is a preliminary to the test method.
6. Environmental aspects - OPTIONAL	
7. How do you plan to address these environmental aspects? - OPTIONAL	
8. Track	Enquiry + Formal Vote (ENQ+FV)
9. Related mandate(s)	No
10. Related directive(s)	Yes Directive reference   For citation in Official journal 305/2011   No
11. The decision was taken by	Simple majority Number of positive votes: 16 Number of negative votes: 0 Number of abstentions: 8

## Decision CEN/TC 227 832/2017 taken on 2017-03-06

### Subject: Adoption of a Preliminary Work Item

#### CEN/TC 227 - Road materials

- having considered the proposal for a new work item as documented in CEN/TC 227 N 2783
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs

- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

<b>Section</b>	<b>Details</b>
1. Deliverable	EN
2. This item corresponds to	The revision of an EN EN 12272-3:2003
3. Document developed in drafting body	CEN/TC 227/WG 2 - Surface Dressing, Sprays and Slurry Surfacing (incorporating Microsurfacing)
4. Title	Surface dressing - Test methods - Part 3: Determination of binder aggregate adhesivity by the Vialit plate shock test method
5. Scope	This European Standard applies to the measurement of the binder-aggregate systems for surface dressing. This European Standard specifies methods of measurement of: the mechanical adhesion of the binder to the surface of the aggregate, - the active adhesivity of the binder the the chippings, - the improvement of the mechanical adhesion and active adhesivity by adding an adhesion agent either into the mass of the binder or by spraying the interface between binder and chippings, - the wetting temperature fo the binder to the aggregate, - the variation of adhesivity below the fragility temperature.
6. Environmental aspects - OPTIONAL	
7. How do you plan to address these environmental aspects? - OPTIONAL	
8. Track	Enquiry + Formal Vote (ENQ+FV)
9. Related mandate(s)	No
10. Related directive(s)	Yes Directive reference   For citation in Official journal 305/2011   No
11. The decision was taken by	Simple majority Number of positive votes: 15 Number of negative votes: 1 Number of abstentions: 8

# Decision CEN/TC 227 833/2017 taken on 2017-03-06

## Subject: Adoption of a Preliminary Work Item

### CEN/TC 227 - Road materials

- having considered the proposal for a new work item as documented in CEN/TC 227 N 2783
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	The revision of an EN EN 12273:2008
3. Document developed in drafting body	CEN/TC 227/WG 2 - Surface Dressing, Sprays and Slurry Surfacing (incorporating Microsurfacing)
4. Title	Slurry surfacing - Requirements
5. Scope	<p>This European Standard specifies the performance requirements and control procedures for the installation of slurry surfacing as a product for the surface treatment of roads and other trafficked areas (e.g. footways, cycleways).</p> <p>This European Standard is not designed for small areas of slurry surfacing on roads that are less than 500 m<sup>2</sup> which are not contiguous (for example minor repairs).</p> <p>This European Standard does not apply to slurry surfacing designed by the purchaser.</p> <p>This European Standard is not applicable to slurry surfacing carried out in tunnels in terms of reaction to fire. No such regulations have yet been identified, nor is there any method of classification of reaction to fire.</p> <p>NOTE Member States can call up the technical requirements of this European Standard for use in tunnels.</p> <p>This European Standard is not designed for pavements that are covered by international regulations, for example, International Civil Aviation Organisation (ICAO) regulations (airfields).</p>
6. Environmental aspects - OPTIONAL	

7. How do you plan to address these environmental aspects? - OPTIONAL	
8. Track	Enquiry + Formal Vote (ENQ+FV)
9. Related mandate(s)	Yes M/124
10. Related directive(s)	Yes Directive reference   For citation in Official journal 305/2011   Yes
11. The decision was taken by	Simple majority Number of positive votes: 17 Number of negative votes: 0 Number of abstentions: 6

## Decision CEN/TC 227 834/2017 taken on 2017-03-06

### Subject: Adoption of a Preliminary Work Item

#### CEN/TC 227 - Road materials

- having considered the proposal for a new work item as documented in CEN/TC 227 N 2783
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	The revision of an EN EN 12274-8:2005
3. Document developed in drafting body	CEN/TC 227/WG 2 - Surface Dressing, Sprays and Slurry Surfacing (incorporating Microsurfacing)
4. Title	Slurry surfacing - Test methods - Part 8: Visual assessment of defects
5. Scope	This European Standard specifies qualitative and quantitative test methods of the visual assessment of defects of slurry surfacing. This European Standard is applicable to all slurry surfacing (roads,

	<p>airfields and other areas).  The visual assessment reports for both methods have identical records and thus both may be used to check the specification for visual assessment of defects EN 12273-1.  Defects emanating from the substrate (existing road) should not be taken into consideration.  NOTE 1 The qualitative and quantitative tests may be used separately or sequentially. This may relate to different types of site (for example lightly trafficked roads may not be required to be quantitatively assessed).  NOTE 2 The test may be used to evaluate the durability of slurry surfacing.</p>
6. Environmental aspects - OPTIONAL	
7. How do you plan to address these environmental aspects? - OPTIONAL	
8. Track	Enquiry + Formal Vote (ENQ+FV)
9. Related mandate(s)	Yes M/124
10. Related directive(s)	Yes Directive reference   For citation in Official journal 305/2011   No
11. The decision was taken by	Simple majority Number of positive votes: 16 Number of negative votes: 0 Number of abstentions: 8

## 6 CEN/TC 239

Decision CEN/TC 239 257/2017 taken on 2017-03-09

Subject: Adoption of a New Work Item

CEN/TC 239 - Rescue systems

- having considered the proposal for a new work item as documented in CEN/TC 239 N 678
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs

- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

<b>Section</b>	<b>Details</b>
1. Deliverable	EN
2. This item corresponds to	The revision of an EN EN 1789:2007+A2:2014
3. Document developed in drafting body	CEN/TC 239/WG 1 - Medical vehicles and their equipment - Stretchers and other patient handling equipment
4. Title	Medical vehicles and their equipment - Road ambulances
5. Scope	<p>This European Standard specifies requirements for the design, testing, performance and equipping of road ambulances used for the transport, monitoring, treatment and care of patients. It contains requirements for the patient's compartment in terms of the working environment, ergonomic design and the safety of the crew and patients. This European Standard does not cover the training of the staff which is the responsibility of the authority/authorities in the country where the ambulance is to be registered.</p> <p>This European Standard is applicable to road ambulances capable of transporting at least one person on a stretcher and excludes the transportation of hospital beds.</p> <p>This standard also specifies requirements for ambulances intended to carry transport incubator systems.</p> <p>The European Standard covers the specific requirements of each type of road ambulance which are designated according to the patient condition e.g. patient transport road ambulance types A1, A2, B and C.</p> <p>This European Standard gives general requirements for medical devices carried in road ambulances and used therein and outside hospitals and clinics in situations where the ambient conditions can differ from normal indoor conditions.</p>
6. Environmental aspects	Emissions to air Noise/Vibration Use of energy Use of materials
7. How do you plan to address these environmental aspects?	Bring in environmental expertise to the WG
8. Vienna Agreement	No or expected CEN lead
9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)

11. Related mandate(s)	Yes M/023
12. Related directive(s)	Yes Directive reference   For citation in Official journal 93/42/EEC   Yes
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: AFNOR SFS ASI SIS DIN UNE DS UNI IPQ
14. The decision was taken by	Weighted vote and simple majority Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):100 Number of positive votes: 13 Number of negative votes: 0 Number of abstentions: 10

## 7 CEN/TC 248

### Decision CEN/TC 248 02/2017 taken on 2017-03-08

#### Subject: CEN/TC 248 - Decision to skip the Formal Vote

##### CEN/TC 248 - Textiles and textile products

- considering the results of the Enquiry ballot;
- considering the table of decisions and the formal written proposals as distributed after the comments decision meeting;
- considering the CEN/CENELEC Internal Regulations - Part 2, clause 11.2.3;
- considering Decisions BT 34/2002, BT 42/2003 and related document BT N 6962 concerning timeframes for the development of ENs;
- considering Decision BT 35/2014 to associate a vote to the CEN Enquiry and to allow Technical Bodies to decide to skip the Formal Vote;
- considering Decision 49/2014 to allow Technical Bodies to decide to skip the Formal Vote through a TC decision based on simple majority only;

decides to skip the Formal Vote and proceed with the publication of WI 00248606 - prEN ISO 6179 - Rubber, vulcanized or thermoplastic - Rubber sheets and rubber-coated fabrics - Determination of transmission rate of volatile liquids (gravimetric technique) (ISO/DIS 6179:2016) *(In this case the TC must not finalize the publication, this will be done by CCMC.*

*Instead the TC must notify CCMC of its intention to skip Formal Vote by posting only an electronic transmission notice onto eTrans.)*

The decision was taken by simple majority with 12 positive vote(s), 0 negative vote(s) and 7 abstention(s).

## Decision CEN/TC 248 20/2016 taken on 2016-11-21

### Subject: Adoption of a New Work Item

#### CEN/TC 248 - Textiles and textile products

- having considered the proposal for a new work item as documented in CEN/TC 248 N 1416
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 248/WG 30 - Composition - Qualitative and quantitative analysis of fibres and fibre mixtures
4. Title	Textiles -- Method for the detection and determination of alkylphenol ethoxylates (APEO) -- Part 2: Method using NPLC
5. Scope	Scope not Available
6. Environmental aspects	Use of energy
7. How do you plan to address these environmental aspects?	Use of environmental checklist
8. Vienna Agreement	Yes - Parallel ISO lead ISO project reference: ISO/AWI 18254-2 ISO project ID: 69536 ISO TC: ISO/TC 38

9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	No
12. Related directive(s)	No
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: AFNOR SIS BSI DIN NBN
14. The decision was taken by	Weighted vote and simple majority Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):100 Number of positive votes: 16 Number of negative votes: 0 Number of abstentions: 1

## Decision CEN/TC 248 21/2016 taken on 2016-11-21

### Subject: Adoption of a New Work Item

#### CEN/TC 248 - Textiles and textile products

- having considered the proposal for a new work item as documented in CEN/TC 248 N 1413
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	A new project
3. Document developed in drafting	CEN/TC 248/WG 30 - Composition - Qualitative and quantitative analysis of fibres and fibre mixtures

body	
4. Title	Textiles -- Method for determination of alkylphenols (AP)
5. Scope	No scope available
6. Environmental aspects	Use of energy
7. How do you plan to address these environmental aspects?	Use of environmental checklist
8. Vienna Agreement	Yes - Parallel ISO lead ISO project reference: ISO/AWI 21084 ISO project ID: 69894 ISO TC: ISO/TC 38
9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	No
12. Related directive(s)	No
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: AFNOR BSI DIN NBN UNI
14. The decision was taken by	Weighted vote and simple majority Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):100 Number of positive votes: 15 Number of negative votes: 0 Number of abstentions: 1

## Decision CEN/TC 248 25/2016 taken on 2016-11-21

Subject: Adoption of a New Work Item

CEN/TC 248 - Textiles and textile products

- having considered the proposal for a new work item as documented in CEN/TC 248 N 1416
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope

- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

<b>Section</b>	<b>Details</b>
1. Deliverable	EN
2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 248/WG 30 - Composition - Qualitative and quantitative analysis of fibres and fibre mixtures
4. Title	Textiles -- Qualitative and quantitative proteomic analysis of some animal hair fibres -- Part 1: Peptide detection using LC-ESI-MS with protein reduction
5. Scope	Scope not available
6. Environmental aspects	Use of energy
7. How do you plan to address these environmental aspects?	Use of environmental checklist
8. Vienna Agreement	Yes - Parallel ISO lead ISO project reference: ISO 20418-1 ISO project ID: 67945 ISO TC: ISO/TC 38

## Decision CEN/TC 248 26/2016 taken on 2016-11-21

### Subject: Adoption of a New Work Item

#### CEN/TC 248 - Textiles and textile products

- having considered the proposal for a new work item as documented in CEN/TC 248 N 1416
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 248/WG 30 - Composition - Qualitative and quantitative analysis of fibres and fibre mixtures
4. Title	Textiles -- Quantitative microscopical analysis -- General principles of testing
5. Scope	Scope Not available
6. Environmental aspects	Use of energy
7. How do you plan to address these environmental aspects?	Use of environmental checklist
8. Vienna Agreement	Yes - Parallel ISO lead ISO project reference: ISO 20705 ISO project ID: 68876 ISO TC: ISO/TC 38
9. The project is linked to	No document from another organization

10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	No
12. Related directive(s)	No
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: AFNOR SFS SIS BSI UNI
14. The decision was taken by	Weighted vote and simple majority Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):100 Number of positive votes: 15 Number of negative votes: 0 Number of abstentions: 0

## 8 CEN/TC 250

### DECISION 9/2017 taken by CEN/TC 250 on 2017-03-03

Subject: CEN/TC 250 – Re-appointment of CEN/TC 250/SC 9 Chairperson

CEN/TC 250 Structural Eurocodes,

- considering the CEN/CENELEC Internal Regulations - Part 2, sub clause 3.2.2, which lays down the rules for nomination, appointment and responsibilities of Chairpersons;
- noting the Chairman's briefing note 2016-1 on 'Re-appointment of Chairpersons and Convenors' (CEN/TC 250 N 1446) and ensuing endorsement by Members of CEN/TC 250 decision 422/2016 (CEN/TC 250 N 1514);
- noting the nomination by the Technical Committee Secretariat;
- noting the commitment of the professional standardization support from SN;
- noting the commitment of the applicant to the responsibilities and duties of a Subcommittee Chairperson as given in the CEN BOSS;

decides to re-appoint Prof. Federico Mazzolani as Chairperson of CEN/TC 250/SC 9 for a period of 3-years starting on 2017-03-05, noting that Prof. Mazzolani has been Chairperson of the Subcommittee since 1990.

The decision was taken by unanimity or simple majority with 20 positive votes, 0 negative vote(s) and 3 abstention(s).

## 9 CEN/TC 254

### Decision CEN/TC 254 510/2017 taken on 2017-03-06

#### Subject: Adoption of a New Work Item

#### CEN/TC 254 Flexible sheets for waterproofing

- having considered the proposal for a new work item as documented in CEN/TC 254 N 1622
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 254 - Flexible sheets for waterproofing
4. Title	Flexible sheets for waterproofing and Solar Reflectance Index
5. Scope	This standard gives a calculation method of the Solar Reflectance Index (SRI) and the determination of solar reflectivity and thermal emissivity for waterproofing flexible sheets for roofs with a slope smaller than 10°.
6. Environmental aspects	None of the above: Not relevant
7. How do you plan to address these environmental aspects?	Other: Not relevant
8. Vienna Agreement	No or expected CEN lead
9. The project is linked to	No document from another organization

10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	No
12. Related directive(s)	No
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: AFNOR BSI SNV DIN DS UNI NEN
14. The decision was taken by	Weighted vote and simple majority Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):100 Number of positive votes: 8 Number of negative votes: 0 Number of abstentions: 14

## 10CEN/TC 264

Decision CEN/TC 264 1032/2017 taken on 2017-01-30

Subject: Adoption of a Preliminary Work Item

CEN/TC 264 - Air quality

- having considered the proposal for a new work item as documented in CEN/TC 264 N 2402
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item	A new project

corresponds to	
3. Document developed in drafting body	CEN/TC 264/WG 45 - Proficiency testing schemes for emission measurements
4. Title	Air Quality - Requirements on proficiency testing schemes for emission measurements
5. Scope	<p>This European Standard specifies requirements on</p> <ul style="list-style-type: none"> <li>- the competence of proficiency testing providers,</li> <li>- the test bench performance, and</li> <li>- the design, operation and evaluation of proficiency testing schemes by means of interlaboratory tests.</li> </ul> <p>Requirements on the competence of proficiency testing providers cover e.g. personnel, organisation, equipment and environment. Requirements on the test bench performance cover e.g. measurement sections, measurement ports and working area for the participants.</p> <p>Requirements on the proficiency testing schemes cover</p> <ul style="list-style-type: none"> <li>- the design including e.g. planning, preparations, homogeneity and stability of test atmospheres and statistical design,</li> <li>- the operation including e.g. handling and instruction of participants, and</li> <li>- the evaluation including e.g. data analysis and evaluation of proficiency testing scheme results.</li> </ul> <p>This European Standard supplements the requirements of EN ISO/IEC 17043.</p> <p>This European Standard supports the application of proficiency testing schemes for</p> <ul style="list-style-type: none"> <li>- checking the performance of testing laboratories in the context of accreditation and related quality checks,</li> <li>- training of the personnel of test laboratories, and</li> <li>- validation of measurement methods and verification of their performance.</li> </ul>
6. Environmental aspects - OPTIONAL	Emissions to air
7. How do you plan to address these environmental aspects? - OPTIONAL	Bring in environmental expertise to the WG
8. Track	Enquiry + Formal Vote (ENQ+FV)
9. Related mandate(s)	No
10. Related directive(s)	No
11. The decision was taken by	<p>Simple majority</p> <p>Number of positive votes: 12</p> <p>Number of negative votes: 1</p>

	Number of abstentions: 7
--	--------------------------

## 11 CEN/TC 290

Decision CEN/TC 290 109/2017 taken on 2017-03-07

Subject: Adoption of a New Work Item

CEN/TC 290 - Dimensional and geometrical product specification and verification

- having considered the proposal for a new work item as documented in CEN/TC 290 N 668
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 290 - Dimensional and geometrical product specification and verification
4. Title	Geometrical product specifications (GPS) - Geometrical tolerancing - Global and general GPS specifications
5. Scope	<p>The purpose of this document is to provide guidelines for the definition and the interpretation of specifications that apply globally to a workpiece. General specifications defined in general standards are not covered by this document.</p> <p>This document proposes two main ways to define such specifications:</p> <ul style="list-style-type: none"> <li>- (non-general) global GPS specifications;</li> <li>- general GPS specifications.</li> </ul> <p>Global GPS specifications are using the surface profil symbol with a leader line connected to the workpiece and the <math>\forall</math> symbol. Independency principle applies between them. This type of specifications is not concerned by the general specification principle. General GPS specifications are subject to the general specification principle defined in ISO 8015.</p>

6. Environmental aspects	Other: Adoption of ISO 22081 under Vienna Agreement, ISO lead
7. How do you plan to address these environmental aspects?	Other: Not relevant
8. Vienna Agreement	Yes - Parallel ISO lead ISO project reference: ISO 22081 ISO project ID: 72514 ISO TC: ISO/TC 213
9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	No
12. Related directive(s)	No
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: AFNOR ASI SIS BSI UNI
14. The decision was taken by	Weighted vote and simple majority Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):77.8 Number of positive votes: 10 Number of negative votes: 1 Number of abstentions: 0

## Decision CEN/TC 290 110/2017 taken on 2017-03-07

### Subject: Adoption of a New Work Item

#### CEN/TC 290 - Dimensional and geometrical product specification and verification

- having considered the proposal for a new work item as documented in CEN/TC 290 N 669
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available

- decides to register the work item described below in its active programme of work

<b>Section</b>	<b>Details</b>
1. Deliverable	EN
2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 290 - Dimensional and geometrical product specification and verification
4. Title	Geometrical product specifications (GPS) - Edges of defined shape
5. Scope	<p>A transition is an areal feature connecting two adjacent features, for which the intersection is a line. The transition includes portions of the adjacent features. This document defines a number of specification operators for the specification of defined transitions. These specifications all apply to any line in a defined direction in the transition feature. It also defines the specification modifiers and the drawing indications for such transition specifications. The proportions and dimensions of the graphical symbols to be used are also specified.</p> <p>This document provides a set of tools to express several defined transition specifications. It does not present any information on the relationship between a function or a use and a defined transition specification.</p>
6. Environmental aspects	None of the above: Adoption of ISO 21204 under Vienna Agreement, ISO lead
7. How do you plan to address these environmental aspects?	Other: Not relevant
8. Vienna Agreement	Yes - Parallel ISO lead ISO project reference: 21204 ISO project ID: 70084 ISO TC: ISO/TC 213
9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	No
12. Related directive(s)	No
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: AFNOR ASI

	SIS BSI UNI
14. The decision was taken by	Weighted vote and simple majority Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):77.8 Number of positive votes: 10 Number of negative votes: 1 Number of abstentions: 7

## 12 CEN/TC 301

### Decision CEN/TC 301 297/2017 taken on 2017-03-06

#### Subject: Adoption of a New Work Item

#### CEN/TC 301 - Road vehicles

- having considered the proposal for a new work item as documented in CEN/TC 301 N 600
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 301/WG 7 - Supplementary grip devices
4. Title	Road vehicles - Supplementary grip devices for tyres of passenger cars and light duty vehicles - Safety requirements and test method
5. Scope	This European Standard provide specifications for safety, quality and performance requirements for supplementary grip devices, commonly called "SGDs", for current legislation, intended to be fitted on tyres on vehicles of category M1, N1, O1, O2 and relevant sub-categories (off road

	vehicles).
6. Environmental aspects	Use of materials
7. How do you plan to address these environmental aspects?	Bring in environmental expertise to the WG
8. Vienna Agreement	No or expected CEN lead
9. The project is linked to	No document from another organization
10. Track	Enquiry + Formal Vote (ENQ+FV)
11. Related mandate(s)	No
12. Related directive(s)	No
13. Commitment	The following CEN members (at least five) are committed to participate in the development of the project: AFNOR ASI SIS BSI DIN UNI
14. The decision was taken by	Weighted vote and simple majority Percentage of positive weighted votes (min. 71% before 2017-01-01, min. 65% from 2017-01-01):100 Number of positive votes: 10 Number of negative votes: 0 Number of abstentions: 8

## 13 CEN/TC 332

Decision CEN/TC 332 90/2016 taken on 2016-01-31

Subject: Adoption of a Preliminary Work Item

CEN/TC 332 - Laboratory equipment

- having considered the proposal for a new work item as documented in CEN/TC 332 N
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS

- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

<b>Section</b>	<b>Details</b>
1. Deliverable	EN
2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 332/WG 4 - Fume cupboards
4. Title	Ventilation systems in laboratories
5. Scope	New standard dealing with Ventilation systems in laboratories. Operation of ventilation systems in laboratory buildings or in individual laboratory rooms requires particular care and attention due to its safety relevance. This applies for users of ventilation systems as well as for operators of laboratory buildings. This standard will support planning, execution and maintenance Tasks of these ventilation systems. A special expertise with regard to the operation and function of laboratories and the effectiveness of technical laboratory equipment is required, particularly because of the many possible interfaces for extract air equipment relevant to safety. This standard will apply for the planning, design, installation and commissioning of ventilation systems in laboratories. It will also apply for scientific classrooms in schools when equipped with a Ventilation system.
6. Environmental aspects - OPTIONAL	None of the above
7. How do you plan to address these environmental aspects? - OPTIONAL	
8. Track	Enquiry + Formal Vote (ENQ+FV)
9. Related mandate(s)	No
10. Related directive(s)	No
11. The decision was taken by	Simple majority Number of positive votes: 10 Number of negative votes: 0

	Number of abstentions: 7

## Decision CEN/TC 332 93/2016 taken on 2016-01-31

### Subject: Adoption of a Preliminary Work Item

#### CEN/TC 332 - Laboratory equipment

- having considered the proposal for a new work item as documented in CEN/TC 332 N
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 332/WG 4 - Fume cupboards
4. Title	Fume Cupboards for work with Radioactive Materials
5. Scope	<p>This document specifies Fume Cupboards for work with unsealed Radioactive Materials with specific requirements regarding radiation protection.</p> <p>If there are no definitions in this document, EN 14175-1 to EN 14175-6, Radiation Protection and Safety of Radiation Sources: International Basic Safety Standards (IAEA SAFETY STANDARDS SERIES No. GSR Part 3) are essential.</p> <p>The purpose of this document is to set out rules for the design and testing of radionuclide fume cupboards, in order to provide guidelines for the planner, installer, operator, assessor and the authorities.</p>
6. Environmental aspects - OPTIONAL	None of the above
7. How do you plan to address these environmental aspects? - OPTIONAL	

8. Track	Enquiry + Formal Vote (ENQ+FV)
9. Related mandate(s)	No
10. Related directive(s)	No
11. The decision was taken by	Simple majority Number of positive votes: 9 Number of negative votes: 0 Number of abstentions: 8

## 14CEN/TC 442

Decision CEN/TC 442 86/2017 taken on 2017-03-05

Subject: Adoption of a Preliminary Work Item

CEN/TC 442 - Building Information Modelling (BIM)

- having considered the proposal for a new work item as documented in CEN/TC 442 N 177
- having considered the Guidance - Adoption of a new work item in a CEN Technical Committee as documented in the BOSS
- confirming that the new work item falls within its scope
- confirming that the new work item corresponds to real market needs
- confirming that the resources to complete the work below are available
- decides to register the work item described below in its active programme of work

Section	Details
1. Deliverable	EN
2. This item corresponds to	A new project
3. Document developed in drafting body	CEN/TC 442/WG 3 - Information Delivery Specification
4. Title	Digital information exchange - Definition of activities and transactions and use cases of built assets within a framework of steps of maturity and activities
5. Scope	The key information exchange demands are identified and mapped to a framework of steps of maturity. For each demand and use cases related activities and transactions are recognized and standardized

	<p>for the collaboration within the building industry on a European context.</p> <p>Use Case: The definitions of a generic purpose specific use of BIM</p> <p>Activities: A set of generic activities to be executed to support the use case with explicit specification of national variations</p> <p>Input/output: A specific set of requirements for the BIM transaction to be used as a basis for project agreements</p>
6. Environmental aspects - OPTIONAL	
7. How do you plan to address these environmental aspects? - OPTIONAL	
8. Track	Enquiry + Formal Vote (ENQ+FV)
9. Related mandate(s)	No
10. Related directive(s)	No
11. The decision was taken by	<p>Simple majority</p> <p>Number of positive votes: 16</p> <p>Number of negative votes: 1</p> <p>Number of abstentions: 3</p>
